### Before you start

- **Information to User**
  - The Safety of Your Ears is in Your Hands

### What's what

- **Head unit**
  - Home display
  - Turning the source ON/OFF
  - Selecting a source
  - Adjusting the volume
  - Remote control

### Common operations

- **Common operations for menu settings/lists**
  - Operating the scroll icon and the scrubber bar
  - Activating the touch panel keys
  - Using the rear view
  - Using the rear monitor
  - Using sound retriever
  - Changing the wide-screen mode

### Basic operations

- **Opening and closing the LCD panel**
  - Adjusting the LCD panel slide position
  - Adjusting the LCD panel angle

### App Radio Mode

- **AppRadio Mode operation**
  - Starting procedure

### Tuner

- **Tuner operations**
  - Storing and recalling stations
  - Storing the strongest stations
  - Tuning in to strong signals
  - Using iTunes tagging

### Disc (CD/DVD)

- **Introducing movie operations**
  - Sound playback operations
  - Switching the media file type
  - Operating the DVD menu
  - Random play (shuffle)
  - Repeating playback
  - Searching for the part you want to play
  - Selecting audio output
  - PBC playback
  - Selecting tracks from the track title list
  - Selecting files from the file name list
  - Playing DivX VOD content

### iPod control

- **Moving images operations**
  - Sound playback operations
  - Using this unit's iPod function from your iPod
  - Shuffle play
  - Repeating playback
  - Playing videos from your iPod
  - Browsing for a video/music on the iPod
  - Changing audiobook speed
  - Displaying lists related to the song currently playing (link search)

### Bluetooth telephone

- **Bluetooth telephone operations**
  - Calling a number in the phone book
  - Selecting a number by alphabet search mode
  - Inverting names in phone book
  - Using the missed, received and dialed call lists
  - Setting automatic answering
  - Adjusting the other party's listening volume
  - Switching the ring tone
  - Using the preset dial lists

### USB

- **USB sound mixing**
  - Music browse mode
  - Random play (shuffle)
  - Repeating playback
  - Selecting files from the file name list
  - Displaying lists related to the song currently playing (link search)

### Settings

- **Menu operations**
  - Using balance adjustment
  - Using the equalizer
  - Adjusting loudness
  - Using subwoofer output
  - Boosting the bass
  - Using the high pass filter
  - Adjusting source levels

### Audio adjustments

- **Adjusting source levels**
  - Using balance adjustment
  - Using the equalizer
  - Adjusting loudness
  - Using subwoofer output
  - Boosting the bass
  - Using the high pass filter
  - Adjusting source levels

### Setting up the video player

- **Setting the subtitle language**
  - Setting the audio language
  - Setting the DivX subtitle file
  - Displaying the DivX VOD registration code
  - Automatic playback of DVDs

### System settings

- **Switching the auxiliary setting**
  - Setting AV input
  - Setting the RGB Input
  - Setting the Pandora connect mode
  - Setting the App sound mixing
  - Setting MIXTRAX mode
  - Changing the picture adjustment
  - Selecting the system language
  - Setting Demo Mode
  - Switching sound muting/attenuation

WARNING
Do not attempt to install or service this product by yourself. Installation or servicing of this product by persons without training and experience in electronic equipment and automotive accessories may be dangerous and could expose you to the risk of electric shock, injury or other hazards.

To ensure safe driving

WARNING
• LIGHT GREEN LEAD AT POWER CONNECTOR IS DESIGNED TO DETECT PARKED STATUS AND MUST BE CONNECTED TO THE POWER SUPPLY SIDE OF THE PARKING BRAKE SWITCH. IMPROPER CONNECTION OR USE OF THIS LEAD MAY VIOLATE APPLICABLE LAW AND MAY RESULT IN SERIOUS INJURY OR DAMAGE.
• To avoid the risk of damage and injury and the potential violation of applicable laws, this unit is not for use with a video screen that is visible to the driver.
• To avoid the risk of accident and the potential violation of applicable laws, no viewing of front seat video should ever occur while the vehicle is being driven.
• In some countries or states the viewing of images on a display inside a vehicle even by persons other than the driver may be illegal. Where such regulations apply, they must be obeyed and this unit’s video features should not be used.

When you attempt to watch a video image while driving, the warning “Viewing of front seat video source while driving is strictly prohibited,” will appear on the front display.
To watch a video image on the front display, park your vehicle in a safe place and apply the parking brake.

Thank you for purchasing this PIONEER product.
To ensure proper use, please read through this manual before using this product. It is especially important that you read and observe WARNINGS and CAUTIONS in this manual. Please keep the manual in a safe and accessible place for future reference.

IMPORTANT SAFEGUARDS
Please read all of these instructions regarding your display and retain them for future reference.

1. Do not install the display where it may (i) obstruct the driver’s vision, (ii) impair the performance of any of the vehicle’s operating systems or safety features, including air bags, hazard lamp buttons or (iii) impair the driver’s ability to safely operate the vehicle.
2. Do not operate this display if doing so in any way will divert your attention from the safe operation of your vehicle. Always observe safe driving rules and follow all existing traffic regulations. If you experience difficulty in operating the system or reading the display, park your vehicle in a safe location and make necessary adjustments.
3. Please remember to wear your seat belt at all times while operating your vehicle. If you are ever in an accident, your injuries can be considerably more severe if your seat belt is not properly buckled. Never use headphones while driving.
4. To promote safety, certain functions are disabled unless the parking brake is on, and the vehicle is not in motion.
5. Never set the volume of your display so high that you cannot hear outside traffic and emergency vehicles.

<CRD4711-A/N>3
Parking Brake Interlock

Certain functions (Video viewing and certain touch panel keys) offered by this unit could be dangerous and/or unlawful if used while driving. To prevent such functions from being used while the vehicle is in motion, there is an interlock system that senses when the parking brake is set. If you attempt to use the functions described above while driving, they will become disabled until you stop the vehicle in a safe place, and (1) apply the parking brake, (2) release the parking brake, and then (3) apply the parking brake again. Please keep the brake pedal pushed down before releasing the parking brake.

When Using a Display Connected to Rear Monitor Output

The rear monitor output on this unit (V OUT) is used to connect a rear display that allows passengers in the rear seats to watch videos.

WARNING
NEVER install the rear display in a location where the driver can watch videos while driving.

When Using the Rear View Camera

With an optional rear view camera, this unit can be used as an aid to keep an eye on trailers, or while backing up. Do not use for entertainment purposes.

CAUTION
- The rear view camera function is to be used as an aid to keep an eye on trailers, or while backing up. Do not use for entertainment purposes.
- Please note that the edges of the rear view camera images may differ slightly according to whether full screen images are displayed when backing up, and whether the images are used for checking the rear when the vehicle is moving forward.

To avoid battery exhaustion

Keep the vehicle engine running when using this unit to avoid draining the battery power.
- When no power is supplied to this unit, such as when the vehicle battery is being replaced, the microcomputer of this unit returns to its initial condition. We recommend that you transcribe the audio adjustment data.

WARNING
Never use with vehicles that do not feature an ACC position.

WARNING
Screen image may appear reversed.

Use input only for reverse or mirror image rear view camera. Other use may result in injury or damage.

Information to User

FCC ID: AJDK062
MODEL NO.: AVH-X7500BT
IC: 775E-K062
This device complies with Part 15 of FCC Rules and Industry Canada licence-exempt RSS standards. Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of this device.

This transmitter must not be co-located or operated in conjunction with any other antenna or transmitter.

The rear view camera function is to be used as an aid to keep an eye on trailers, or while backing up. Do not use for entertainment purposes.

WARNING
![SCREEN IMAGE MAY APPEAR REVERSED.](image)

USE INPUT ONLY FOR REVERSE OR MIRROR IMAGE REAR VIEW CAMERA. OTHER USE MAY RESULT IN INJURY OR DAMAGE.

MODEL NO.: AVH-X6500DVD
This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Alteration or modifications carried out without appropriate authorization may invalidate the user’s right to operate the equipment.

Note
This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
The Safety of Your Ears is in Your Hands

Get the most out of your equipment by playing it at a safe level—a level that lets the sound come through clearly without annoying blaring or distortion and, most importantly, without affecting your sensitive hearing. Sound can be deceiving. Over time, your hearing “comfort level” adapts to higher volumes of sound, so what sounds “normal” can actually be loud and harmful to your hearing. Guard against this by setting your equipment at a safe level BEFORE your hearing adapts.

ESTABLISH A SAFE LEVEL:
- Set your volume control at a low setting.
- Slowly increase the sound until you can hear it comfortably and clearly, without distortion.
- Once you have established a comfortable sound level, set the dial and leave it there.

BE SURE TO OBSERVE THE FOLLOWING GUIDELINES:
- Do not turn up the volume so high that you can’t hear what’s around you.
- Use caution or temporarily discontinue use in potentially hazardous situations.
- Do not use headphones while operating a motorized vehicle; the use of headphones may create a traffic hazard and is illegal in many areas.

About this unit

The tuner frequencies on this unit are allocated for use in North America. Use in other areas may result in poor reception.

WARNING
Handling the cord on this product or cords associated with accessories sold with the product may expose you to chemicals listed on proposition 65 known to the State of California and other governmental entities to cause cancer and birth defect or other reproductive harm. Wash hands after handling.

CAUTION: USE OF CONTROL OR ADJUSTMENT OR PERFORMANCE OF PROCEDURES OTHER THAN THOSE SPECIFIED HEREIN MAY RESULT IN HAZARDOUS RADIATION EXPOSURE. CAUTION: THE USE OF OPTICAL INSTRUMENTS WITH THIS PRODUCT WILL INCREASE EYE HAZARD.

CAUTION
This product is a class 1 laser product classified under the Safety of laser products, IEC 60825-1:2007, and contains a class 1M laser module. To ensure continued safety, do not remove any covers or attempt to gain access to the inside of the product. Refer all servicing to qualified personnel.

DVD video disc region numbers

Only DVD video discs with compatible region numbers can be played on this player. You can find the region number of the player on the bottom of this unit and in this manual (refer to Specifications on page 61).

About this manual

- This unit features a number of sophisticated functions to ensure superior reception and operation. All the functions have been designed for the easiest possible use, but many are not self-explanatory. This operation manual will help you benefit fully from this unit’s potential and to maximize your listening enjoyment.
- This manual uses diagrams of actual screens to describe operations. However, the screens on some units may not match those shown in this manual depending on the model used.

After-sales service for Pioneer products

Please contact the dealer or distributor from where you purchased this unit for after-sales service (including warranty conditions) or any other information. In case the necessary information is not available, please contact the companies listed below.

1 Register your product. We will keep the details of your purchase on file to help you refer to this information in the event of an insurance claim such as loss or theft.
2 Receive updates on the latest products and technologies.
3 Download owner’s manuals, order product catalogues, research new products, and much more.
4 Your feedback is important in our continual effort to design and build the most advanced, consumer-focused product in the industry.

Protecting your unit from theft
The front panel can be detached to deter theft.

⚠️ Important
- Handle the front panel with care when removing or attaching it.
- Avoid subjecting the front panel to excessive shock.
- Keep the front panel out of direct sunlight and high temperatures.
- If removed, replace the front panel on the unit before starting up your vehicle.
- To avoid damaging the device or vehicle interior, remove any cables and devices attached to the front panel before detaching it.

Removing the front panel
- Pinch the top and bottom of its right side and pull the front panel out.
  Take care not pinch it too tightly or to drop it, and also avoid contact with water or other fluids to prevent permanent damage.

Re-attaching the front panel
1 Slide the front panel to the left.
   The front panel and the head unit are connected on the left side. Make sure that the front panel has been properly connected to the head unit.
2 Press the right side of the front panel until it is firmly seated.
   - If you can’t attach the front panel to the head unit successfully, try again. Forcing the front panel into place may result in damage.

WARNING
- Keep the battery out of the reach of children. Should the battery be swallowed, consult a doctor immediately.
- Batteries (battery pack or batteries installed) must not be exposed to excessive heat such as sunshine, fire or the like.

CAUTION
- Use one CR2025 (3 V) lithium battery.
- Remove the battery if the remote control is not used for a month or longer.
- There is a danger of explosion if the battery is incorrectly replaced. Replace only with the same or equivalent type.
- Do not handle the battery with metallic tools.
- Do not store the battery with metallic objects.
- If the battery leaks, wipe the remote control completely clean and install a new battery.
- When disposing of used batteries, comply with government regulations or environmental public institutions’ rules that apply in your country/area.
- “Perchlorate Material – special handling may apply. See www.dtsc.ca.gov/hazardouswaste/perchlorate (Applicable to California, U.S.A.)”

Using the remote control
Point the remote control in the direction of the front panel to operate.

Do not use unauthorized products.

Notes
- When an iPhone is connected, press and hold the home button to activate the voice control.
- When the navigation system is connected, press MODE to switch to the navigation display. Press and hold MODE to turn the display off. Press MODE again to turn the display on.
- For details on how to operate a navigation system from this unit, refer to its operation manual.
- When an iPhone that is running an application that supports AppRadio Mode is connected, press MODE to switch to the application display. You can use the application by touching the display.
- For details on how to connect an iPod or USB storage device to this unit, refer to When connecting with optional CD-IU201V cable on page 45.

Home display

1 Source icon
   Selecting a favorite source. When the source icon is not displayed, it can be displayed by pressing the home key or touching 📱.

2 Apps key
   Switching to AppRadio Mode.

3 Rear view key
   Displaying the rear view image. For details refer to Using the rear view on page 9.

4 Source off key
   Turning the source off.

5 Bluetooth key
   Displaying the Bluetooth connection menu.

6 Theme key
   Displaying the Theme menu.

7 Menu icon
   Displaying the menu.

8 Source key
   Displaying the source menu.

9 Clock key
   Switching to clock adjustment display.

Turning the source ON/OFF

Turning the source on using the buttons
1 Press SRC/OFF to turn the source on.

Turning the source off using the buttons
1 Press and hold SRC/OFF until the source turns off.
Selecting a source

Available source modes
- Radio – Radio tuner
- Disc – Built-in DVD and CD player
- USB/iPod – USB/iPod
- Pandora – Pandora™ internet radio
- Bluetooth Audio – Built-in Bluetooth audio (Function of AVH-X7500BT)
- AUX – AUX
- AV – AV input

Selecting a source
- Using SRC/OFF
  1. Press SRC/OFF.
- Using the touch panel keys on the home display
  1. Touch the source icon and then touch the desired source name.
- When the source icon is not displayed, it can be displayed by touching the screen.
- While operating the menu, you cannot select a source by touching the source icon.

Note
The USB/iPod icon will change as follows:
- USB is displayed when a USB storage device is connected to USB input.
- iPod is displayed when an iPod is connected to USB input.
- USB/iPod is displayed when no device is connected.
- iPod is not displayed when RGB Input is set to iPhone (VGA adapter).
  Refer to Setting the RGB Input on page 33.

Adjusting the volume
- Turn VOLUME to adjust the volume.

Remote control

Press to perform fast forward.
Press to change the fast forward speed.

Press to return to the previous track (chapter).

Press to go to the next track (chapter).

Press to stop playback.
If you resume playback, playback will start from the point where you stopped. Touch the key again to stop playback completely.

Press to select the tuner band when tuner is selected as a source. Also used to cancel the control mode of functions.
Press to switch between modes when playing the following types of data:
- Disc Compressed audio and audio data (CD-DA) such as with CD-EXTRA and MIXED-MODE CDs
- USB storage device Audio data

FOLDER/PCH
Press to select the next or previous disc or folder.
Press to recall radio station frequencies assigned to preset channel keys.

MUTE
Press to mute. Press again to unmute.

MENU
Press to display the DVD menu during DVD playback.
TOP MENU
Press to return to the top menu during DVD playback.

AUDIO
Press to change the audio language during DVD playback.
Press to switch audio output for DivX/MPEG-4.

SUBTITLE
Press to change the subtitle language during DVD/DivX/MPEG-4 playback.

ANGLE
Press to change the viewing angle during DVD playback.
Common operations for menu settings/lists

- **Starting the Bluetooth telephone menu.**
  For details refer to Bluetooth telephone on page 26.
- **Displaying the list menu.**
  Starting the search function.
- **Displaying the EQ (Audio function menu).**
- **Displaying the Favorite menu.**

Operating the scroll icon and the scrubber bar

- **Scroll icon**
  Appears when selectable items are hidden.
- **Scrubber bar**
  Appears when items cannot be displayed on a single page only.

Viewing the hidden items

1. Touch the scroll icon or drag the scrubber bar to view any hidden items.
2. Also, you can drag the list to view any hidden items.

Specifying the playback point

1. Drag the scrubber bar on the screen. (Not available when the scrubber bar is grayed out.)

Using the rear view key to display the rear view

- **Activating the touch panel keys**
  Touch panel keys

Using the rear view key to display the rear view

- **Displaying the rear view image by turning the rear view image on.**
  When the rear view image is displayed, you can switch to the source display by touching the display. You can operate from the source display temporarily at this time. If you do not perform any operations within a few seconds, the display will return to the rear view image.
  To turn off the rear view image, press the home button to return to the home display and then press this key again.

Using the rear monitor

- Connecting a rear monitor, sold separately, to this unit allows images and videos to be viewed from the rear seats.

Using sound retriever

- **Off**
  Automatically enhances compressed audio and restores rich sound.
  - 
  - is more effective than .

Notes

- You cannot use touch panel keys and operation screens from the rear monitor.
- Images and video will continue to be displayed whether the vehicle is in motion or stopped.

Using sound retriever

- **Off**
  Automatically enhances compressed audio and restores rich sound.
Common operations

Notes
- This function is enabled for playback on the sources listed below.
  - CD-DA
  - MP3/WMA/AAC/WAV files on USB storage devices
  - MP3/WMA/AAC files on CD media
  - iPod
  - Pandora
  - This function is not available on an iPod with lightning connector or Android devices.
- The sound retriever setting is turned off when the MIXTRAX function is used in USB source mode.

Changing the wide-screen mode

1. Display the screen mode.
2. Touch the desired wide mode setting.

Full (full screen)
The 4:3 picture is enlarged in the horizontal direction only, granting viewers a 4:3 TV picture (normal picture) without any omissions.

Zoom (zoom)
The 4:3 picture is enlarged in the same proportion both vertically and horizontally; ideal for a cinema sized picture (wide screen picture).

Normal (normal)
The 4:3 picture is displayed as is, granting viewers no sense of disparity as the proportions are the same as that of the normal picture.

Notes
- You cannot operate this function while driving.
- Different settings can be stored for each video source.
- When a video is viewed in a wide screen mode that does not match its original aspect ratio, it may appear different.
- Remember that using the wide mode feature of this system for commercial or public viewing purposes may constitute an infringement on the author's rights protected by the Copyright Law.
- The video image will appear coarser when viewed in Zoom mode.
- This function is enabled for playback on the sources listed below.
  - Disc: DVD-V, Video-CD, DivX, MPEG-1, MPEG-2, MPEG-4
  - iPod: Video
  - AV: AV data
  - AUX: AV data

Basic operations

Opening and closing the LCD panel

The LCD panel will open or close automatically when the ignition switch is turned on or off. You can turn off the automatic close/open function.

- Do not close the LCD panel by force with your hands. That will cause a malfunction.
- The automatic close/open function will operate the display as follows.
  - When the ignition switch is turned OFF while the LCD panel is opened, the LCD panel will close after six seconds.
  - When the ignition switch is turned ON again (or turned to ACC), the LCD panel will open automatically.
  - Removing or attaching the front panel will automatically close or open the LCD panel. (Refer to Protecting your unit from theft on page 6.)
  - When the ignition switch is turned OFF after the LCD panel has been closed, the ignition switch ON again (or turning it to ACC) will not open the LCD panel. In this case, press OPEN/CLOSE to open the LCD panel.
  - When closing the LCD panel, check to make sure that it has closed completely. If the LCD panel has stopped halfway, leaving it like this could result in damage.

CAUTION
Keep hands and fingers clear of the unit when opening, closing, or adjusting the LCD panel. Be especially cautious of children's hands and fingers.

- Press OPEN/CLOSE to open the LCD panel.
- To close the LCD panel, press OPEN/CLOSE again.

Setting the automatic open function

To prevent the display from hitting the shift lever of an automatic vehicle when it is in the P (park) position, or when you do not wish the display to open/close automatically, you can set the automatic open function to manual mode.

1. Press the home button to switch to the home display.
2. Touch the system key to open the system menu.
3. Touch Auto Flap to select whether to open/close the display automatically or manually.
   Each time you touch Auto Flap the setting switches between:
   - On – The LCD panel will open or close automatically when the ignition switch is turned on or off.
   - Off – You have to press OPEN/CLOSE to open/close the LCD panel.

Turning the LCD panel horizontally

When the LCD panel is upright and hinders the operation of the air conditioner, the panel can be turned horizontally temporarily.

1. Press and hold OPEN/CLOSE to display the flip menu.
2. Touch the flip down temporarily key to flip the LCD panel down to the horizontal position.

| Flips the LCD panel down to the horizontal position temporarily. |

<CRD4711-A/N>10
Ejecting a disc

- Press ▲ to eject a disc.

Setting the clock

1. Touch the Clock key. The Clock Adjustment screen appears. For details refer to Home display on page 7.
2. Select the item to set.
3. Touch ▲ or ▼ to set the correct date and time.

Adjusting the LCD panel angle

- Important
  - If you can hear the LCD panel knocking against your vehicle’s console or dashboard, touch the flip down temporarily key from the flap menu to temporarily level the LCD panel.

- As the set angle is saved, the LCD panel will automatically be adjusted to the same position the next time the LCD panel is opened.

Basic operations

- To return to the original position, press and hold OPEN/CLOSE.
- The LCD panel returns to the original position automatically, indicated with a beeping sound 10 seconds after operation.

Adjusting the LCD panel slide position

You can adjust the LCD panel slide position so that the panel is set back or forward.

1. Press and hold OPEN/CLOSE to display the flap menu.
2. Touch the slide back key or slide front key to move the LCD panel back and forth.

Adjusting the LCD panel angle

- When adjusting the LCD panel angle, be sure to adjust from the flap menu. Forcibly adjusting the LCD panel by hand may damage it.
Tuner operations

Touch panel keys

1 Band key
   Selecting a band (FM1, FM2 or FM3) by
touching the left icon. Switching to the AM
band by touching the right icon.
The icon for the selected band is highlighted.

2 Tag key
   Saving song information (tag) from the
casting station to your iPod.

3 Local key
   Setting the local seek level.

4 Tuning key
   Tuning up or down manually. Touch and hold down for more than two sec-
seconds to skip stations. Seek tuning starts as
soon as you release. Touch again to cancel
seek tuning.

5 List key
   Displaying the preset channel list.

6 Preset channel key
   Selecting a preset channel.

Basic operations

Switching preset channels using the buttons
1 Press ◀ or ► (TRK).

Seek tuning using the buttons
1 Press and hold ◀ or ► (TRK).

Notes
- Listening AM radio while an iPod is charged
from this unit may generate noise. In this
case, disconnect the iPod from this unit.
- Touch panel keys not listed under Tuner oper-
ations may appear on the display.

Storing and recalling stations

You can easily store up to six stations for each
band as presets.

1 Display the preset screen.
   Refer to Tuner operations on page 12.
The preset screen appears in the display.

2 Touch BSM to turn BSM on.
The six strongest broadcast frequencies will be
stored under preset channel keys in order of
their signal strength.
   ● To cancel the storage process, touch Cancel.

Tuning in to strong signals

Local seek tuning allows you to tune in to only
those radio stations with sufficiently strong sig-
nals for good reception.

FM: Off — — — — — — — —
AM: Off — — — — — — — —
The more ■ there are on the screen, the fewer
the stations that can be selected. Only stations
with the strongest signals in your local area can
be selected.
If there are fewer ■, this unit will be able to re-
cieve broadcasts from weaker stations.

Storing the strongest stations

BSM (best stations memory) automatically
stores the six strongest stations in the order of
their signal strength.
Storing broadcast frequencies with BSM may re-
place broadcast frequencies you have saved
using the preset channel keys.

1 Display the preset screen.
   Refer to Tuner operations on page 12.
The preset screen appears in the display.

2 Touch BSM to turn BSM on.
The six strongest broadcast frequencies will be
stored under preset channel keys in order of
their signal strength.
   ● To cancel the storage process, touch Cancel.

Using iTunes tagging

Note
For more details about iTunes tagging, refer to
About iTunes tagging on page 56.

Storing the tagged information to
your iPod

1 Connect your iPod.
When your iPod is connected to this unit, your
iPod starts storing the tagged information auto-
matically.

2 When completed, ▼ tag indicator turns
   off and ▼ indicator is displayed.

Storing the tag information to
this unit

1 Tune in to the broadcast station.

2 Store the tag information to this unit.
   Refer to Tuner operations on page 12.
You can store the information if the Tag indicator
is displayed while the desired song is being
broadcast.

- While storing the tag data on this unit, Tag
flashes.
- The tag information for up to 50 songs can be
   stored on this unit.
- Depending on the timing of when the tag infor-
   mation is stored, the tag information for the song
   played before or after the currently playing song may
   also be stored.

3 When completed, ▼ tag indicator turns
   off and ▼ indicator is displayed.

Notes
- Listening AM radio while an iPod is charged
from this unit may generate noise. In this
case, disconnect the iPod from this unit.
- Touch panel keys not listed under Tuner oper-
ations may appear on the display.

- Storing and recalling stations
- Tuning in to strong signals
- Storing the strongest stations
- Using iTunes tagging
- Storing the tagged information to
your iPod
- Storing the tag information to
this unit

En
Introducing movie operations
You can use this unit to view DVD/DVD-R/DVD-RW/CD/CD-R/CD-RW movie files.

Touch panel keys

1. Fast forward key/Reverse key
   Fast forwarding or reversing

2. Search key
   Starting the search function.

3. Switch subtitle language key
   With DVDs/DivX files featuring multi-subtitle recordings, you can switch between subtitle languages during playback.

4. Switch audio language key
   With DVDs/DivX files that provide audio playback in different languages and different audio systems (Dolby Digital, DTS, etc.), you can switch between languages/audio systems during playback. Depending on the setting, the video may not be played back with the audio system used to record the DVD.

5. TOP MENU key
   Returning to the top menu during DVD playback.

6. MENU key
   Displaying the DVD menu during DVD playback.

7. Slow-motion playback key
   Moving the selection ahead one frame at a time during playback. Touch and hold down the key for more than two seconds to slow down playback speed. Touching the key increases the playback speed over four incremental settings during slow motion playback on DVD video/Video CD.

8. Stop key
   Stopping playback. If you resume playback, playback will start from the point where you stopped. Touch the key again to stop playback completely.

9. Screen mode key
   Changing the screen mode. Refer to Changing the wide-screen mode on page 10.

10. Pause and play key
    Pausing playback. Returning to normal playback during paused, slow motion, or frame-by-frame playback.

11. Return key
    Returning to the specified scene to which the DVD currently being played has been pre-programmed to return. This function cannot be used if a specified scene has not been preprogrammed on the DVD disc.

12. Bookmark key
    During playback, touch the point at which you want to resume playback the next time the disc is loaded. You can set one bookmark per DVD video. You can set up to five bookmarks total. The oldest bookmark is replaced by the new one.

13. Media key
    Switching between media file types to play on DVD/CD.

14. Audio output key
    Switching the audio output, when playing video discs recorded with LPCM audio.

15. Slow key
    Speeding down the playback speed in four steps, during slow motion playback on DVD video/Video CD.
    • There is no sound during slow motion playback.
    • Images during slow motion playback may be unclear for some discs.
    • Reverse slow motion playback is not available.

16. Media key
    Switching between media file types to play on DVD/CD.

Basic operations

1. Playing back videos
   Insert the disc into the disc loading slot with the label side up. Playback will automatically start.
   • If you are playing a DVD or Video CD, a menu may appear. Refer to Operating the DVD menu on page 14 and PBC playback on page 15.
   • When the automatic playback function is on, the unit will skip the DVD menu and automatically start playback from the first chapter of the first title. Refer to Automatic playback of DVDs on page 33.
   • When the source icon is not displayed, it can be displayed by touching the screen.
   • If a message is displayed after loading a disc containing DivX VOD content, touch PLAY. Refer to Playing DivX® VOD content on page 16.

Ejecting a disc
   • Refer to Ejecting a disc on page 11.
Disc (CD/DVD)

Selecting a chapter using the buttons
Press ◄ or ► (TRK).

Fast forwarding or reversing using the buttons
Press and hold ◄ or ► (TRK).

- Fast forward/fast reverse may not always be possible on some discs. In such cases, normal playback will automatically resume.
- The fast forward/fast reverse speed depends on the length of time you press and hold down ◄ or ► (TRK). This function is not available for Video CD.

Notes
- This DVD player can play back a DivX file recorded on CD-R/RW, DVD-R/RW, or MPEG-1/MPEG-2/MPEG-4. (Please see the following section for files that can be played back. Refer to DivX video files on page 55.)
- Do not insert anything other than a DVD-R/RW or CD-R/RW into the disc loading slot.
- Some operations may not be available while watching a media due to the programming of the disc. In such cases, the icon appears on the screen.
- There may be touch panel keys not listed under Introducing movie operations on page 13 that appear on the screen. Refer to Indicator list on page 53.
- With some DVDs, switching between languages/audio systems may only be possible using a menu display.
- You can also switch between languages using Video Setup menu. For details, refer to Setting the subtitle language on page 31.
- This unit will return to normal playback if you change the subtitle language during fast forward/fast reverse, pause or slow motion playback.
- During playback of a scene shot from multiple angles, the angle icon is displayed. Use the Video Setup menu to turn the angle icon display on or off. For details, refer to Setting the multi-angle DVD display on page 32.
- You will return to normal playback if you change the viewing angle during fast forward/fast reverse, pause or slow motion playback.

Sound playback operations
You can use this unit to listen to DVD-R/DVD-RW/CD/CD-R/CD-RW sound files.

Disc (CD/DVD)

Operating the DVD menu
Some DVDs allow you to make a selection from the disc contents using a menu.

Using the arrow keys
1. Display arrow keys to operate the DVD menu.
2. Select the desired menu item.

Switching the media file type
When playing a digital media containing a mixture of various media file types, such as DivX, MPEG-1, MPEG-2, MPEG-4 and MP3, you can switch between media file types to play.

- Touch Media to switch media file types.
- CD (audio data (CD-DA))—Music/ROM (compressed audio)—Video (DivX, MPEG-1, MPEG-2, MPEG-4 video files)

Note
Audio data (CD-DA) files on DVD-R/RW/ROM cannot be played back on this unit.

When operating the DVD menu by directly touching the menu item, touch the icon to operate.
**Disc (CD/DVD)**

- Ways to display the menu will differ depending on the disc.
- Depending on the contents of the DVD disc, this function may not work properly. In such cases, use the touch panel keys to operate the DVD menu.

**Random play (shuffle)**

- Touch the random key.
  - **On** – Play back files in random order within the repeat range. **Folder** and **Disc**.
  - **Off** – Cancel random play.

**Repeating playback**

- Touch the repeat key.
  - **Disc** – Play through the current disc.
  - **Chapter** – Repeat the current chapter.
  - **Title** – Repeat the current title.
  - **Track** – Repeat the current track.
  - **File** – Repeat the current file.
  - **Folder** – Repeat the current folder.
  - **On** – Repeat just the current video/song.

**Notes**

- This function cannot be operated during Video CD playback featuring PBC (playback control).
- If you select another folder during repeat play, the repeat play range changes to **Disc**.
- If you perform title/chapter search or fast forward/reverse during **Folder**, the repeat play range changes to **Folder**.

**Searching for the part you want to play**

You can use the search function to find the part you want to play.

For DVD videos, you can select **Title** (title), **Chapter** (chapter) or **10key** (numeric keypad).
For video CDs, you can select **Track** (track) or **10key** (numeric keypad).

- **Chapter** search is not available when disc playback is stopped.
- **This function cannot be operated during Video CD playback featuring PBC (playback control).**

**Notes**

- Touch the audio output key to switch audio output types.
- **L+R** – Left and right
- **Left** – Left
- **Right** – Right
- **Mix** – Mixing left and right

**Selecting audio output**

When playing DVD video discs recorded with LPCM audio, you can switch the audio output. When playing video CDs, you can switch between stereo and monaural audio output.

- **This function is not available when disc playback is stopped.**

**Searching for the part you want to play**

You can use the search function to find the part you want to play.

For DVD videos, you can select **Title** (title), **Chapter** (chapter) or **10key** (numeric keypad).
For video CDs, you can select **Track** (track) or **10key** (numeric keypad).

- Chapter search is not available when disc playback is stopped.
- **This function cannot be operated during Video CD playback featuring PBC (playback control).**

1. **Start the search function.**
- Refer to **Introducing movie operations on page 13**.

2. **Touch the desired search option (e.g., Chapter).**

3. **Touch 0 to 9 to input the desired number.**
   - To cancel the entered numbers, touch **C**.

4. **Start playback from the selected part.**

**Selecting tracks from the track title list**

You can select tracks to playback using the track title list which is a list of the tracks recorded on a disc.

1. **Display the track title list.**
   - Refer to **Sound playback operations on page 14**.

2. **Touch your favorite track title.**
   - Playback begins.

**Selecting files from the file name list**

(Function for compressed audio/DivX/MPEG-1/MPEG-2/MPEG-4)

File name list is a list of file names (or folder names) from which you can select a file (or folder) to play back.

1. **Touch the search key to display the file (or folder) name list.**
2. **Touch your favorite file (or folder) name.**
   - When you have selected a folder, a list of the names of the files (or the folders) in it can be viewed.
   - Repeat this operation to select the desired file name.
   - If folder 1 (ROOT) contains no files, playback starts from folder 2.
Note
If part of the recorded information does not display, a scroll key appears on the right side of list. Touch the scroll key to scroll.

Playing DivX® VOD content
Some DivX video on demand (VOD) content may only be playable a fixed number of times. When you load a disc containing this type of content, the number of times it has been played will be shown on-screen. You can then decide whether or not to play the disc.
- For DivX VOD content without this restriction, you can load the disc into your player and play the content as often as you like, with no message displayed.
- You can confirm the number of times that the content can be played by checking the message, This DivX rental has used [ ] out of [ ] views.

Important
- In order to play DivX VOD contents on this unit, you first need to register the unit with your DivX VOD contents provider. For details on your registration code, refer to Displaying the DivX® VOD registration code on page 33.
- DivX VOD content is protected by a DRM (Digital Rights Management) system. This restricts playback of content to specific, registered devices.
- If a message is displayed after loading a disc containing DivX VOD content, touch PLAY. Playback of the DivX VOD content will start.
- To skip to the next file, touch NEXT.
- If you do not want to play the DivX VOD content, touch STOP.

iPod control
This manual applies to the following iPod models.
iPod with 30-pin connector
- iPod touch 4th generation
- iPod touch 3rd generation
- iPod touch 2nd generation
- iPod touch 1st generation
- iPod classic 160GB
- iPod classic 120GB
- iPod classic
- iPod with video
- iPod nano 6th generation
- iPod nano 5th generation
- iPod nano 4th generation
- iPod nano 3rd generation
- iPod nano 2nd generation
- iPod nano 1st generation
- iPhone 4S
- iPhone 4
- iPhone 3GS
- iPhone 3G
- iPhone
iPod with lightning connector
- iPod touch 5th generation
- iPod nano 7th generation
- iPhone 5

For iPod with lightning connector users
- Use the Lightning to USB Cable (Supplied with iPod/iPhone) when you use this function.
- Refer to When connecting with Lightning to USB Cable on page 44.
- Functions related to iPod movie files are not available.
- If AppRadio Mode is used, the functions in this section cannot be used. Refer to AppRadio Mode operation on page 19.

Moving images operations
For iPod with 30-pin connector users
You can use the unit to view iPod movie files.
- Depending on your iPod, there may not be any output unless you use CD-IU201S/CD-IU201V (sold separately). Be sure to use CD-IU201S/CD-IU201V to connect your iPod.

For iPod with lightning connector users
- This function is not available.

Touch panel keys

Fast forward key/Reverse key
Fast forwarding or reversing. Touch to change the fast forward and reverse speed.

Search key
Displaying iPod menus.

iPod control mode key
Conducting operation from your iPod and listening to it using your car’s speakers.

Shuffle key
Playing the video on your iPod in a random order.
Basic operations

Playing back videos
1. Touch the search key to pull up the iPod menus.
2. Select a movie to play.
   Refer to Playing videos from your iPod on page 18.
   - When the source icon is not displayed, it can be displayed by touching the screen.
   - Disconnect headphones from the iPod before connecting it to this unit.
   - Depending on the iPod model and the amount of data stored in the iPod, it may take some time for playback to begin.
   - Use the touch panel keys to select the iPod after connecting it to this unit.
   - No Device is displayed when disconnecting the iPod.

Fast forwarding or reversing using the buttons
1. Press and hold ◄ or ► TRK.

Notes
- To ensure proper operation, connect the dock connector cable from the iPod directly to this unit.
- While the iPod is connected to this unit, the iPod cannot be turned on or off.
- Touch panel keys not listed under Moving images operations may appear on the display. Refer to Indicator list on page 53.

Sound playback operations
You can use the unit to listen to iPod sound files.
Note
The play time may not display correctly.

Touch panel keys

iPod audio (Control Audio)

1. Song title
   Displaying the Songs list on the iPod.
2. Artist name
   Displaying the Artists list on the iPod.
3. MIXTRAX EZ key
   Starting MIXTRAX EZ. Refer to MIXTRAX EZ operation on page 23.
4. Artwork
   Starting link search on your iPod when you touch the artwork display.
5. Search key
   Displaying iPod menus.
6. Sound retriever key
   Refer to Using sound retriever on page 9.
7. iPod control mode key
   Conducting operation from your iPod and listening to it using your car’s speakers.
8. Shuffle key
   Playing songs on the iPod in random order.
9. Repeat key
   Selecting the repeat range.
10. Change speed key
    Changing the speed of audiobook playback on the iPod.
11. Genre
    Displaying the Genres list on the iPod.
12. Album title
    Displaying the Albums list on the iPod.
13. Pause and play key
    Pausing and starting playback.
14. Unit operation key
    Performing operations from this unit and listening to the music on your iPod using your car’s speakers.
15. Screen mode key
    Changing the screen mode.

Using this unit’s iPod function from your iPod
You can listen to sound from applications on your iPod using the car’s speakers when App Mode is selected. This function is not compatible with the following iPod models.
- iPod nano 1st generation
- iPod with video

Notes
- Video-related functions are not available to iPod with lightning connector users.
- While this function is in use, the iPod will not turn off even if the ignition key is turned off. Operate the iPod to turn off the power.
1. Switch the control mode to App Mode. Refer to Moving images operations on page 16. Refer to Sound playback operations on page 17.
2. Operate the connected iPod to select a video/song and play.

Notes
- The following functions are still accessible from the unit even if the control mode is set to App Mode.
  - Playing/pausing
  - Fast forwarding/reversing
  - Tracking up/down
  - Moving to a chapter up/down
- App Mode is compatible with the following iPod models.
  - iPod touch 4th generation
  - iPod touch 3rd generation
  - iPod touch 2nd generation
  - iPod touch 1st generation
  - iPod classic 160GB
  - iPod classic 120GB
  - iPod classic
Shuffle play

- Touch the shuffle key.
  - Songs – Play back videos/songs in the selected list in random order.
  - Albums – Play back videos/songs from a randomly selected album in order.
  - Off – Turn off shuffle play.

Repeating playback

- Touch the repeat key.
  - One – Repeat just the current video/song
  - All – Repeat all videos/songs in the selected list on the iPod

Playing videos from your iPod

Videos can be played on this unit if an iPod with video capabilities is connected.
- This unit can play back “Movies”, “Music videos”, “Video Podcast” and “TV show” which are downloaded from the iTunes store.

Note
This function is not available to iPod with lightning connector users.

1 Touch Search to display iPod menus.
Refer to Moving images operations on page 16.

2 Switch to iPod video mode.

3 Play the video from the iPod.

Browsing for a video/music on the iPod

To make operating and searching easy, operations to control an iPod with this unit are designed to be as similar to the iPod as possible.

Note
Video-related functions are not available to iPod with lightning connector users.

Searching for a video/music by category

1 Touch the search key to pull up the iPod menus.
Refer to Sound playback operations on page 17.

2 Touch one of the categories in which you want to search for a video/music.
- Video Playlists (video playlists)
- Movies (movies)
- Music Videos (music videos)
- Video Podcasts (video podcasts)
- TV Shows (TV shows)
- Playlists (playlists)
- Artists (artists)
- Albums (albums)
- Songs (songs)
- Podcasts (podcasts)
- Genres (genres)
- Composers (composers)
- Audiobooks (audiobooks)

3 Touch the title of the list that you want to play.
Repeat this operation until you find the desired song/video.

Changing audiobook speed

- Touch the change speed key to change the speed.

Note
- Depending on the generation or version of the iPod, some functions may not be available.
- You can play playlists created with the MusicSphere application. The application will be available on our website.
- Playlists that you created with the MusicSphere application are displayed in abbreviated form.

Searching the list by alphabet

1 Select a category.
Refer to Searching for a video/music by category on page 18.

2 Touch to alphabet search mode.

Alphabet search mode is displayed.

3 Touch the first letter of the title of the video/song you are looking for.
While searching, touch panel key operation is not available.
- To refine the search with a different letter, touch Cancel.

4 Touch the title of the list that you want to play.
Repeat this operation until you find the desired song/video.
Displaying lists related to the song currently playing (link search)

Touch the artwork to open a list of the names of songs on the album currently playing. Touch the name of the song you want to play to start playing that song.

Note

If part of the recorded information does not display, a scroll key appears on the right side of list. Touch the scroll key to scroll.

AppRadio Mode operation

This system can switch to the AppRadio Mode, which you can display and operate the application for iPhone on the screen.

In AppRadio Mode, you can operate applications with finger gestures such as tapping, dragging, scrolling or flicking on the screen of the system.

Install the AppRadio app on your iPhone.

WARNING

Certain uses of a smartphone may not be legal while driving in your jurisdiction, so you must be aware of and obey any such restrictions.

If in doubt as to a particular function, only perform it while the car is parked.

No feature should be used unless it is safe to do so under the driving conditions you are experiencing.

CAUTION

While driving, you cannot enter text on your iPod.

• Pioneer is not liable for any issues that may arise from incorrect or flawed app-based content.
• The content and functionality of the supported applications are the responsibility of the App providers.
• In AppRadio Mode, functionality through the product is limited while driving, with available functions determined by the App providers.
• Availability of AppRadio Mode functionality is determined by the App provider, and not determined by Pioneer.
• AppRadio Mode allows access to applications other than those listed (subject to limitations while driving), but the extent to which content can be used is determined by the App providers.

Important

• The only port that supports AppRadio Mode is USB input.
• When listening to music and sounds from application simultaneously, see the following section. Refer to Setting the App sound mixing on page 20.

Notes

• Applications operable by switching this system to AppRadio Mode are only those available for AppRadio Mode.

iPhone compatibility

AppRadio Mode is compatible with the following iPod models.
1 Install the AppRadio app on your iPhone.

2 After configuring RGB Input, connect the iPhone to this unit.
   - For iPod with lightning connector users (Function of AVH-X7500BT)
     - Set RGB Input to iPhone (VGA adapter).
     - Use the CD-IU202AV (sold separately) and Lightning to VGA adapter (Apple Inc. products) (sold separately) when you use this function.
     - Refer to When connecting with optional CD-IU202AV cable on page 44.
   - A Bluetooth connection is required for iPod with lightning connector. Refer to Bluetooth connection menu on page 38.
   - Refer to When connecting with optional CD-IU202AV cable on page 44.
   - For iPod with 30-pin connector users
     - Set RGB Input to iPhone (CD-IU201S).
     - Use the CD-IU201S (sold separately) when you use this function.
     - Refer to When connecting with optional CD-IU201S cable on page 45.

3 Start an application available for AppRadio Mode from the iPhone.

4 Press MODE.
   - Press the home button to switch from the AppRadio Mode display to the home display.
   - Touch the system key to open the system menu.
   - Touch App sound mixing on the System menu to select desired setting.

5 Operate the application.

Setting the Keyboard

CAUTION
For your safety, the keyboard functionality is only available when the vehicle is stopped and the parking brake is engaged.

Depending on the application, you can input text on the display. In order to input text correctly using keyboard which appears on this unit, you need to set the language setting in this function.

When the AppRadio Mode is used, the language setting for the keyboard set for the function and the language setting for the iPhone keyboard need to be the same.
   - Keyboard is available only in AppRadio Mode.
   - When you tap a text input area of an application for iPhone, a keyboard will be displayed on-screen. You can input the desired text directly from this system.
   - The language preference for the keyboard of this system should be same as the setting on your iPhone.
   - If the settings for this product and the iPhone are different, you may not be able to enter characters properly.

5 Tap the text input area on the application screen of the iPhone.

Touch to hide the keyboard.

Setting the App sound mixing

You cannot turn on or off Mixing when this unit is playing a song of iPod.

The sound of application during AppRadio Mode can be adjusted.

Enable this setting when you want to mix the App sound with the sound from a built-in source (such as the radio). The volume of the App sound can be selected from three levels.

This function is not available when RGB Input is set to iPhone (VGA adapter).

Refer to Setting the RGB Input on page 33.

1 Press the home button twice to switch from the AppRadio Mode display to the home display.

2 Touch the system key to open the system menu.

3 Touch App sound mixing on the System menu to select desired setting.

   OFF (off)—Low (low)—Mid (mid)—High (high)
Sound playback operations
You can use this unit to listen to USB audio files.

Notes
- The play time may not display correctly.
- When playing back files recorded as VBR (variable bit rate) files, the play time will not be correctly displayed if fast forward or reverse operations are used.
- To ensure proper operation, connect the dock connector cable from the iPod directly to this unit.
- While the iPod is connected to this unit, the iPod cannot be turned on or off.
- If the characters recorded on the disc are not compatible with this unit, those characters will not be displayed.
- Text information may not be correctly displayed depending on the recorded environment.
- Disconnect the USB portable audio player/USB memory when you are done using it.
- When you select Speana on Selecting the background display on page 39, the artwork is not displayed.

Touch panel keys
1 MIXTRAX EZ key
Starting MIXTRAX EZ.
2 Information key
Switching the text information to display on this unit when playing MP3/WMA/AAC/WAV files.
3 Search key
Displaying the file name list to select the files.
4 Media key
Switching between media file types to play on USB.
5 Sound retriever key
Refer to Using sound retriever on page 9.
6 Random key
Playing songs in random order.
7 Repeat key
Selecting the repeat range.
8 DB key
Creating a database that enables searches by artist name, genre, and other options. Refer to Music browse mode on page 21.
9 Previous folder key/Next folder key
Selecting a folder.
10 Pause and play key
Pausing and starting playback.

Basic operations
Playing back tracks
1 Connect the USB device.
Playback will automatically start.
When the source icon is not displayed, it can be displayed by touching the screen.
Fast forwarding or reversing using the buttons
1 Press and hold ◄ or ► (TRK).

Random play (shuffle)
1 Touch the random key.
- On – Play back files in random order within the repeat range. Folder and Media.
- Off – Cancel random play.

Repeating playback
1 Touch the repeat key.
- File – Repeat the current file
- Folder – Repeat the current folder
- All – Repeat all files
- When Folder is selected, it is not possible to play back a subfolder of that folder.
- If you select USB source, the repeat play range changes to All.

Selecting files from the file name list
(Function for compressed audio)
Operation is the same as that for Disc. Refer to Selecting files from the file name list on page 15.

Displaying lists related to the song currently playing (link search)
Touch the artwork to open a list of the names of songs on the album currently playing. Touch the name of the song you want to play to start playing that song.

Notes
- If part of the recorded information does not display, a scroll key appears on the right side of list. Touch the scroll key to scroll.
- This function is available for USB devices in Music browse mode.
### Sound playback operations
(Function of AVH-X7500BT)
You can use this unit to listen to Bluetooth audio files.

**Notes**
- Depending on the Bluetooth audio player connected to this unit, the available operations will be limited to the following two levels:
  - A2DP profile (Advanced Audio Distribution Profile): You can only playback songs on your audio player.
  - AVRCP profile (Audio/Video Remote Control Profile): You can perform playback, pause playback, select songs, etc.
- As there is a wide variety of Bluetooth audio players available on the market, operations available with specific models may vary extensively. When attempting to run a Bluetooth audio player using this unit, refer to the instruction manual that came with the player as well as to this manual for assistance.
- As the signal from your cellular phone may cause noise, avoid using it when you are listening to songs on your Bluetooth audio player.
- The sound from a Bluetooth audio player connected to this unit will be muted while a call is in progress on a cellular phone connected to this unit via Bluetooth wireless technology.
- The play time may not display correctly.
- Depending on the type of Bluetooth audio player you have connected to this unit, operation and information display may not be available for some functions.

### Touch panel keys

<table>
<thead>
<tr>
<th>Key</th>
<th>Description</th>
</tr>
</thead>
</table>
| 1 | Search key  
Displaying the file name list to select the files. |
| 2 | Random key  
Playing songs in random order. |
| 3 | Repeat key  
Selecting the repeat range. |
| 4 | Pause and play key  
Pausing and starting playback. |

### Setting up for Bluetooth audio
Before you can use the Bluetooth audio function you must establish a Bluetooth wireless connection between the unit and your Bluetooth audio player.

1. **Connection**
   - First, you need to connect a Bluetooth audio to this unit.
   - For detailed instructions on connecting your Bluetooth audio to this unit via Bluetooth wireless technology, refer to Bluetooth connection menu on page 38.

### Random play (shuffle)
- **Touch the random key.**
  - **On** – Play back files in random order.
  - **Off** – Cancel random play.

### Repeating playback
- **Touch the repeat key.**
  - **One** – Repeat the current song only
  - **All** – Repeat all songs

**Notes**
- When playing back files recorded as VBR (variable bit rate) files, the play time will not be correctly displayed if fast forward or reverse operations are used.
- To ensure proper operation, connect the dock connector cable from the iPod directly to this unit.
- While the iPod is connected to this unit, the iPod cannot be turned on or off.
- If the characters recorded on the disc are not compatible with this unit, those characters will not be displayed.
- Text information may not be correctly displayed depending on the recorded environment.
Using MIXTRAX

MIXTRAX operation
MIXTRAX is original technology for creating non-stop mixes of selections from your audio library, complete with DJ effects that make them sound as if a DJ is right there with you playing the music.

MIXTRAX EZ operation
You can use this unit to play iPod/USB audio files. MIXTRAX EZ is used to add a variety of sound effects between songs for arranging the pauses between songs. It allows you to enjoy listening to music non-stop.

- This function is only available when a file on a USB storage device or a song on an iPod is being played.
- This function is not available when the control mode is set to App Mode.
- Depending on the file/song, sound effects may not be available.
- Depending on the file/song, non-stop playback may not be available.

Starting MIXTRAX EZ operation
1. Touch MIXTRAX EZ.

Setting MIXTRAX mode
Turn on this function to play back audio files using MIXTRAX.

1. Press the home button to switch to the home display.
2. Touch the system key to open the system menu.

3. Touch MIXTRAX Setup on the system menu. MIXTRAX setting items are displayed.
   - Short Playback Mode — When turned on, select an audio track playback length. When this mode is turned off, the audio track will play all the way to the end.
   - 60s (60 sec.) — 90s (90 sec.) — 120s (120 sec.) — 150s (150 sec.) — 180s (180 sec.) — Random (random) — Off (off)
   - When Random is selected, the playback time varies between 60 s, 90 s, 120 s, 150 s, and 180 s selected at random when the playback song changes.
   - Display Effect — When Display Effect is set to Disp&Key, the artwork display and keys can be moved according to the music type.
   - Disp&Key (display and key) — Key (key) — Off (off)
   - Cut-In Effect — When Cut-In Effect is set to on, sound effects will play between tracks.
   - Effect Setting — Use Effect Setting to set up the sound effect you want to insert between tracks.
   - Flash Pattern — Use Flash Pattern to select the flash color pattern that can flash when the MIXTRAX is turned on.
   - Random 1 — Sound 1 — Sound 2 — Sound 3 — Sound 4 — Sound 5 — Sound 6 — Random 2 — L-Pass 1 — L-Pass 2 — L-Pass 3 — L-Pass 4 — L-Pass 5 — L-Pass 6 — Random 3

Setting the effect
You can change the settings for fixed sounds and sound effects. There are six different fixed sounds available that can be inserted for playback between tracks.

The sound effects are used as effects to signal the end of a song being played and the beginning of the next song in series.

The fixed sounds and sound effects are set as combinations as MIXTRAX sounds.

Fixed sounds
- Phaser — A fixed sound that sounds like surg- ing waves.
- Roll — A fixed sound that repeats playback of a certain sound.
- Turntable1 — A fixed sound that mimics DJ scratching.
- Flanger1 — A rushing sound that mimics that rising and falling sounds of a jet engine.
- Reverb — A fixed sound effect that creates a reverberation effect.
- Echo — A fixed sound effect that creates an echoing effect.

Sound effects
- Cross Fade — A sound effect that creates a fade in and fade out effect between songs.
- Flanger — A rushing sound that mimics that rising and falling sounds of a jet engine.
- Echo — A sound effect that creates an echoing effect.
- Loop — A sound effect that repeats playback of one section of a song track.

Setting sounds and sound effects as presets using the preset key
The Standard and Simple sound effects are set already as default presets.

1. Touch Custom to easily set the desired sound or sound effect.
2. Add a check mark to the desired sound effect by touching the option.

Notes
- If a sound effect is touched in the selection screen for Standard or Simple, the Custom screen is automatically displayed and the sound effect is registered to Custom.
- You can listen to fixed sounds to hear examples by touching the speaker icon.

Setting sounds and sound effects as presets
Registers a desired combination of sounds and sound effects to Custom.

Using MIXTRAX

1. Touch Custom.
2. Add a check mark to the desired sound effect by touching the option.

The marked sound effect is registered as a preset in Custom.

Notes
- If a sound effect is touched in the selection screen for Standard or Simple, the Custom screen is automatically displayed and the sound effect is registered to Custom.
- You can listen to fixed sounds to hear examples by touching the speaker icon.
Streaming Pandora®

**Pandora operations**

To play Pandora on the Pioneer car audio/video products, connect an iPod, iPhone or Android™ device with the most recent Pandora application installed, and start the Pandora application.

- iPod with lightning connector or Android device can be connected to the AVH-X7500BT.
- Only iPod with 30-pin connector can be connected to the AVH-X6600DVD.

**For iPod with lightning connector users**

(Function of AVH-X7500BT)
- Set **RGB Input** to **iPhone (VGA adapter)**.
- Use the CD-V202AV (sold separately) and Lightning to VGA adapter (Apple Inc. products) (sold separately) when you use this function.
- Refer to **When connecting with optional CD-V202AV cable** on page 44.
- A Bluetooth connection is required for iPod with lightning connector. Refer to **Bluetooth connection menu** on page 38.

**For iPod with 30-pin connector users**

- Set **RGB Input** to **iPhone (CD-IU201S)**.
- Set **Pandora Connection** to **iPhone** (Function of AVH-X7500BT)
- Use the CD-IU201S (sold separately) when you use this function.
- Refer to **When connecting with optional CD-IU201S cable** on page 45.

**For Android device users**

(Function of AVH-X7500BT)
- Set **Pandora Connection** to **Android**.
- A Bluetooth connection is required for Android devices. Refer to **Bluetooth connection menu** on page 38.

**Important**

Requirements to access Pandora using the Pioneer car audio/video products:
- Connect an iPod with 30-pin connector to USB input.
- Connect an iPod with lightning connector to RGB input and enable Bluetooth.
- Connect an Android device to this unit using Bluetooth.
- iPod and iPhone compatibility
  Apple iPhone (first generation), iPhone 3G, iPhone 3GS, iPhone 4, iPhone 4S, iPhone 5, iPod touch 1G, iPod touch 2G, iPod touch 3G, iPod touch 4G or iPod touch 5G (firmware version 3.0 or later)
- Certain firmware versions for the iPhone may not be compatible with the Pandora application. If this appears to be the case, please update the firmware to a version that is compatible with Pandora.
- Android compatibility
  Android OS Version 2.2 or later
- Latest version of the Pandora application, downloaded to your device (Search Apple iTunes App Store or Google Play for “Pandora”).
- Current Pandora account (if you do not have a Pandora account, create one for free at http://www.pandora.com or with the mobile application).
- Data Plan
  Note: If the Data Plan for your iPhone or Android device does not provide for unlimited data usage, additional charges from your carrier may apply for accessing the Pandora service via 3G and/or EDGE networks.
- Connection to the Internet via 3G, EDGE or Wi-Fi network.
- Optional Pioneer adapter cable connecting your iPhone to the Pioneer car audio/video products.

**Limitations:**
- Access to the Pandora service will depend on the availability of a cellular and/or Wi-Fi network for purposes of allowing your device to connect to the Internet.
- Ability of the Pioneer car audio/video products to access the Pandora service is subject to change without notice and could be affected by any of the following: compatibility issues with future firmware versions of iPhones or Android devices; compatibility issues with future firmware versions of the Pandora application for them; changes to the Pandora music service by Pandora; discontinuation of the Pandora music service by Pandora.
- Certain functions of the Pandora service are not available when accessing the service through the Pioneer car audio/video products, including, but not limited to, creating new stations, deleting stations, emailing current stations, buying tracks from iTunes, viewing additional text information, logging in to Pandora, and adjusting Cell Network Audio Quality.

Setting the Pandora connect mode

(Function of AVH-X7500BT)
Set the Pandora connection mode appropriately to notify the system whether you are streaming Pandora over an iPod via USB or over an Android device via Bluetooth.

**Note**
This function is not available when **RGB Input** is set to **iPhone (VGA adapter)**. Refer to **Setting the RGB Input** on page 33.

1. Press the home button to switch to the home display.

2. Touch the system key to open the system menu.

3. Touch **Pandora Connection** repeatedly until the desired setting appears on the screen.

**iPhone:** An iPod is connected using an actual cable.
**Android:** An Android device is connected using Bluetooth.

4. Touch the connect key. (Only when **Pandora Connection** is set to **Android**)

<CRD4711-A/N>24
Streaming Pandora®

Touch panel keys
Pandora (Control Audio)

1. Search key
   Displays the shuffle/station list. Select the desired station or shuffle mode.

2. Sound retriever key
   (Only available on iPod)
   Refer to Using sound retriever on page 9.

3. Bookmark key
   Stores track information (Bookmark). Bookmarks are viewable in your profile.

4. Thumbs-down key
   Giving a “thumbs-down” tells Pandora you do not like the current track. Pandora will skip to the next track, and will not play that track on the station again.

5. Thumbs-up key
   Giving a “thumbs-up” tells Pandora that you like the current track. Pandora will continue to play that track and tracks like it on the station.

6. Pause and play key
   Pausing and starting playback.

7. Connect key
   (Function of AVH-X7500BT)
   Starting the connection to Pandora.

Basic operations

Playing tracks
1. For an iPod with lightning connector or an Android device, a Bluetooth connection is required as well. Refer to Pandora operations on page 24.
2. Switch the source to Pandora.

Skipping tracks
1. Press (TRK).

Notes
- Touch panel keys not listed under Pandora operations may appear on the display. Refer to Indicator list on page 53.
- Pandora limits the number of skips allowed on their service. If you attempt to skip tracks beyond the limit, “Skip limit reached.” is displayed. If you have reached the skip limit and you give a “thumbs-down”, the current track will continue to play, but your feedback will be registered.

Selecting and playing Pandora® stations/shuffle

Touch the list for your Pandora stations to select one of them to play.

1. Display the shuffle/station list.
   Refer to Pandora operations on page 24.

2. Change the sort order.
   A-Z
   You can sort the items in the list alphabetically.

   By Date
   You can sort the items in the list in order of the dates on which the items were created.

   ● ● ● ●
   You can scroll the titles in the list while you touch and hold down the scroll icon.

3. Select shuffle or the desired station.
   Shuffle mode will play tracks from your selected stations. You can edit shuffle preferences on your mobile device.

Note
Stations indicated by are shared stations.
Bluetooth telephone operations
(Function of AVH-X7500BT)
You can use Bluetooth telephone.

Important

- Leaving the unit on standby to connect to your phone via Bluetooth while the engine is not running can drain the battery.
- Advanced operations that require attention such as dialing numbers on the monitor, etc., are prohibited while driving. Park your vehicle in a safe place when using these advanced operations.
- Bluetooth connection menu cannot be selected while driving.
- Operations available may be limited depending on the cellular phone connected to this unit.
- Be sure to park your vehicle in a safe place and apply the parking brake when performing this operation.
- If you are unable to complete the connection using this unit, use the device to connect to the unit.
- If you connect more than one device at a time, connected device may not operate properly. Connecting one device at a time is recommended.

Touch panel keys

**Telephone standby display**

1. Close key
   Display is closed.

2. Preset dial key
   Displaying the preset dial screen.

3. Phone book key
   Switching to the phone book mode.

4. Setting key
   Displaying the Bluetooth connection menu.

5. Tone key
   Turning the ring tone for incoming calls on or off.

6. Auto-answer key
   Turning automatic answering on or off.

7. History key
   Switching to the missed, received and dialed call lists.

8. Key pad key
   Switching the mode to enter the phone number directly.

9. On-hook key

10. Volume key
    Adjusting the other party’s listening volume.

11. Private mode key
    Turning private mode on or off.

12. Off-hook key
    Accepting an incoming call. Making a phone call, when selecting a phone number. Switching between callers on hold.

13. Voice control key

Notes

- Private mode can only be operated while you are talking on the phone.
- To end the call, both you and the other caller must hang up your phones.
- Touch panel keys not listed under Bluetooth telephone operations may appear on the display. Refer to Indicator list on page 53.

Incoming call notice
Indicates that an incoming call has been received and has not been checked yet.
- Not displayed for calls made when your cellular phone is disconnected from this unit.

Setting up for hands-free phoning
Before you can use the hands-free phoning function you must set up the unit for use with your cellular phone. This entails establishing a Bluetooth wireless connection between this unit and your phone, registering your phone with this unit, and adjusting the volume level.

Connection
First, you need to connect a Bluetooth telephone to this unit.
For detailed instructions on connecting your phone to this unit via Bluetooth wireless technology, refer to Pairing from this unit on page 38.

Volume adjustment
Adjust the earpiece volume of your cellular phone to your preference. The unit will record the adjusted volume level as the default setting.

Notes

- The volume of the caller’s voice and ring tone may vary depending on the type of cellular phone.
- If there is a large volume difference between the ring tone and caller’s voice, the overall volume level may become unstable.
Bluetooth telephone

- Make sure to adjust the volume to a proper level before disconnecting the cellular phone from the unit. If the volume is muted (zero level) on your cellular phone, the volume level of your cellular phone remains muted even after the cellular phone is disconnected.

Calling a number in the phone book

The contacts on your phone will normally be transferred automatically when the phone is connected. If it is not, use your phone menu to transfer the contacts. The visibility of this unit should be on when you use the phone menu. Refer to Switching visible unit on page 38. After finding the number you want to call in the phone book, you can select the entry and make the call.

1. Touch the phone book key to switch to the phone book mode.
2. Select the phone number list. The detailed phone number list of the selected entry is displayed.
3. Select the phone number.
   - If you want to store the phone number, touch and hold the list.
4. Touch the off-hook key to make the call.
5. Touch the on-hook key to end the call.

Selecting a number by alphabet search mode

If a lot of numbers are registered in the phone book, you can search for the phone number by alphabet search mode.

1. Touch the phone book key to switch to the phone book mode.
2. Touch ABC to switch to alphabet search mode.
3. Touch the first letter of the entry you are looking for. The Phone Book entries starting with that letter (e.g. “Ben”, “Brian” and “Burt” when “B” is selected) will be displayed.
   - If you want to change the character to Russian, touch the icon. To return to English, touch the icon again.
4. Touch the list to display the phone number list of the selected entry.
   - If several phone numbers are included in an entry, select one by touching the list.
   - If you want to switch to the call history list, touch the icon.
5. Touch the off-hook key to make the call.
6. Touch the on-hook key to end the call.

Inverting names in phone book

When your cellular phone is connected to this unit, the first and last names of your contacts may be registered to the phone book in reverse order. You can use this function to change the order back.

1. Touch the phone book key to switch to the phone book mode.
2. Invert names in phone books.

“Would you like to invert all names?” appears. Touch Yes to continue.

While the names are inverted, you are displayed.
   - If the inversion fails, “Invert Name Error” appears. In such cases, try again from the beginning.

Note

Inverting the names of your contacts from this unit does not affect the data on your Bluetooth device.

Using the missed, received and dialed call lists

The 80 most recent calls dialed, received, and missed are stored in the memory. You can browse them and call numbers from these lists.

1. Touch the history key to display the call history list.

Setting automatic answering

If this function is on, this unit automatically answers all incoming calls.

1. Touch the auto-answer key to turn automatic answering on or off.

Adjusting the other party’s listening volume

To maintain the good sound quality, this unit can adjust the other party’s listening volume. If the volume is not loud enough for the other party, use this function.
Bluetooth telephone

Making a call by entering phone number

Important
Be sure to park your vehicle in a safe place and apply the parking brake when performing this operation.

1 Touch the key pad key to start entering the phone number.

2 Touch the number icons to input the numbers.
   • Up to 24 digits can be entered.

3 Touch the off-hook key to make the call.

4 Touch the on-hook key to end the call.

Voice control

If your cellular phone is equipped with the voice control feature, you can use voice commands to make calls, for example:
• Operation varies depending on the type of cellular phone. Refer to the instruction manual that came with your cellular phone for detailed instructions.
• For details on cellular phone models that are compatible with this feature, refer to the information on our website.

1 Touch the voice control key.

The display switches to the voice control screen. You can also switch to the voice control screen by pressing and holding down the home button while the source is on.

2 Start voice control.

Notes

• Please note that wind blowing through the vehicle windows and noise coming from outside the vehicle can interfere with voice command operation.
• For optimum pick-up, the microphone should be placed directly in front of the driver at a suitable distance.
• Speaking too soon after the start of the command may cause voice recognition to fail.
• Speak slowly, deliberately, and clearly.

Switching the ring tone

You can select whether or not to use this unit’s ring tone. If this function is set to on, the ring tone for this unit will sound.

1 Connect your cellular phone to this unit.

2 Touch the tone key to turn the ring tone on or off.

Using the preset dial lists

You can easily store up to six phone numbers as presets.

1 Touch the preset dial key to display the preset screen.

2 Touch one of the phone numbers to select.
   • If you want to delete a preset phone number, touch and hold the phone number you wish to delete.

3 Touch the off-hook key to make the call.

4 Touch the on-hook key to end the call.

Setting the private mode

During a conversation, you can switch to private mode (talk directly on your cellular phone).

• Touch the private mode key to turn private mode on or off.

Setting can be stored for each device.

Switching the ring tone

You can select whether or not to use this unit’s ring tone. If this function is set to on, the ring tone for this unit will sound.

1 Connect your cellular phone to this unit.

2 Touch the tone key to turn the ring tone on or off.

Using the preset dial lists

You can easily store up to six phone numbers as presets.

1 Touch the preset dial key to display the preset screen.

2 Touch one of the phone numbers to select.
   • If you want to delete a preset phone number, touch and hold the phone number you wish to delete.

3 Touch the off-hook key to make the call.

4 Touch the on-hook key to end the call.

Notes

• In order for your voice commands to be recognized and interpreted correctly, ensure that conditions are suitable for recognition.
Menu operations

Touch panel keys

1 Video setup key
Refer to Setting up the video player on page 31.

2 Audio function key
Refer to Audio adjustments on page 29.

3 Close key
Returning to the current source display.

4 System key
Refer to System settings on page 33.

5 Favorite key
You can choose menus within each menu (Audio function menu, etc.) and register them to this favorite menu. Refer to Favorite menu on page 37.

Notes
• You cannot display the Video Setup menu when a Disc source is selected.
• If you start the Video Setup menu, playback is stopped.

• You cannot display the Audio function menu when the mute function is on.

1 Press the home button to switch to the home display.

2 Touch any of the following touch panel keys to select the menu to be adjusted.

Using fader/balance adjustment
Fader/Balance displays when Rear Speaker is set to Full on the System Menu. You can change the fader/balance setting to provide an ideal listening environment for all of the occupied seats.

1 Press the home button to switch to the home display.

2 Touch the audio function key to open the audio menu.

3 Touch Fader/Balance on the audio function menu.

4 Touch or to adjust the front/rear speaker balance. Range: F 15 L/R 0 to R 15 L/R 0
• Select F/R 0 L/R 0 when only using two speakers.

5 Touch or to adjust the left/right speaker balance. Range: F/R 0 L 15 to F/R 0 R 15

Note
You can also set the balance by dragging the dot on the displayed table.

Using balance adjustment
Balance displays when Rear Speaker is set to Subwoofer on the System Menu. This setting will allow you to adjust the balance between right/left sound output.

1 Press the home button to switch to the home display.

2 Touch the audio function key to open the audio menu.

3 Touch Balance on the audio function menu.

4 Touch or to adjust the left/right speaker balance. Range: F/R 0 L 15 to F/R 0 R 15

Note
You can also set the balance by dragging the dot on the displayed table.

Using the equalizer
You can adjust the equalization to match the car’s interior acoustic characteristics as desired.

Recalling equalizer curves
There are seven stored equalizer curves which you can easily recall at any time. Here is a list of the equalizer curves.

<table>
<thead>
<tr>
<th>Display</th>
<th>Equalizer curve</th>
</tr>
</thead>
<tbody>
<tr>
<td>S.Bass</td>
<td>Super bass</td>
</tr>
<tr>
<td>Powerful</td>
<td>Powerful</td>
</tr>
<tr>
<td>Natural</td>
<td>Natural</td>
</tr>
<tr>
<td>Vocal</td>
<td>Vocal</td>
</tr>
<tr>
<td>Flat</td>
<td>Flat</td>
</tr>
<tr>
<td>Custom1</td>
<td>Custom 1</td>
</tr>
<tr>
<td>Custom2</td>
<td>Custom 2</td>
</tr>
</tbody>
</table>

• The equalizer curves for Custom1 and Custom2 can be adjusted.
• You cannot select Custom1 and Custom2 when using the auto-equalizer.
• When Flat, no changes are made to the sound. You can check the effects of the equalizer curves by switching alternatively between Flat and another equalizer curve.
1 Press the home button to switch to the home display.

2 Touch the audio function key to open the audio menu.

3 Touch Graphic EQ on the audio function menu.
   - You cannot select or adjust the equalizer curves of Custom1 and Custom2 when using the auto-equalizer.

4 Touch the desired setting.
   S.Bass—Powerful—Natural—Vocal—Flat—Custom1—Custom2

### Adjusting the 8-band graphic equalizer
You can adjust the level of each band for the equalizer curves.
- A separate Custom1 curve can be created for each source. If you make adjustments when a curve other than Custom2 is selected, the equalizer curve settings will be stored in Custom1.
- A Custom2 curve that is common for all sources can be created. If you make adjustments when the Custom2 curve is selected, the Custom2 curve will be updated.

1 Press the home button to switch to the home display.

2 Touch the audio function key to open the audio menu.

3 Touch Auto EQ to turn the auto-equalizer on or off.
   - You cannot use this function if auto EQ has not been carried out.

### Using the auto-equalizer
The auto-equalizer is an equalizer curve created by auto EQ (refer to Auto EQ (auto-equalizing) on page 36).
You can turn the auto-equalizer on or off. If you connect an optional microphone to this unit, you can use this function.

1 Press the home button to switch to the home display.

2 Touch the audio function key to open the audio menu.

3 Touch Auto EQ to turn the auto-equalizer on or off.

4 Touch < or > to select cut-off frequency. Off (off)—50Hz—63Hz—80Hz—100Hz—125Hz
Only frequencies lower than those in the selected range are output from the subwoofer.

### Using subwoofer output
This unit is equipped with a subwoofer output which can be turned on or off.
- The cut-off frequency and output level can be adjusted when the subwoofer output is on.

1 Press the home button to switch to the home display.

2 Touch the audio function key to open the audio menu.

3 Touch Subwoofer on the audio function menu.

4 Touch On or Off next to Subwoofer to turn the subwoofer output on or off.

5 Touch Normal or Reverse next to Phase to select the phase of subwoofer output.

6 Touch < or > next to Level to adjust the output level of the subwoofer. Range: +6 to −24

### Adjusting loudness
Loudness compensates for deficiencies in the low-frequency and high-frequency ranges at low volume.

1 Press the home button to switch to the home display.

2 Touch the audio function key to open the audio menu.

3 Touch < or > to select a desired level for loudness.
   Off (off)—Low (low)—Mid (mid)—High (high)

### Boosting the bass
You can boost the bass level.

1 Press the home button to switch to the home display.

2 Touch the audio function key to open the audio menu.

3 Touch < or > to select a desired level. Range: 0 to +6

### Using the high pass filter
When you do not want low sounds from the subwoofer output frequency range to play from the front or rear speakers, turn on the HPF (high pass filter). Only frequencies higher than those in the selected range are output from the front or rear speakers.

1 Press the home button to switch to the home display.

2 Touch the audio function key to open the audio menu.

3 Touch < or > next to Frequency to select the cut-off frequency.
   50Hz—63Hz—80Hz—100Hz—125Hz
Only frequencies higher than those in the selected range are output from the front or rear speakers.
Audio adjustments

Adjusting source levels
With SLA (source level adjustment), the volume levels of each source can be adjusted to prevent significant differences between sources.
- Settings are based on the FM volume level, which remains unchanged.

1 Press the home button to switch to the home display.
2 Touch the audio function key to open the audio menu.
3 Compare the FM volume level with the level of the source you wish to adjust.
4 Touch Source Level Adjuster on the audio function menu.
5 Touch ▲ or ▼ to adjust the source volume.
   Range: +4 to –4

Notes
- Source Level Adjuster is not available when FM is selected as the source.
- The AM volume level can also be adjusted with this function.
- Video CD, CD, compressed audio, DivX, MPEG-1, MPEG-2 and MPEG-4 are automatically set to the same source level adjustment volume.

Setting up the video player

Setting the subtitle language
You can set a desired subtitle language. When available, the subtitles will be displayed in the selected language.

1 Press the home button to switch to the home display.
2 Touch the video setup key to open the video setup menu.
3 Touch Subtitle Language on the Video Setup menu.
   A subtitle language menu is displayed.
4 Touch the desired language.
   The subtitle language is set.
   - If you have selected Others, refer to When you select Others on page 31.

Notes
- If the selected language is not available, the language specified on the disc is displayed.
- You can also switch the subtitle language by touching the switch subtitle languages key during playback.
- The setting made here will not be affected even if the subtitle language is switched during playback using the switch subtitle languages key.

When you select Others
A language code input display is shown when Others is selected. Refer to Language code chart for DVD on page 60.

- Touch 0 to 9 to input the language code.
  - To cancel the entered numbers, touch C.
  - To register the code, touch the following touch panel key.

Setting the audio language
You can set the preferred audio language.

1 Press the home button to switch to the home display.
2 Touch the video setup key to open the video setup menu.
3 Touch Audio Language on the Video Setup menu.
   An audio language menu is displayed.
4 Touch the desired language.
   The audio language is set.
   - If you have selected Others, refer to When you select Others on page 31.

Notes
- If the selected language is not available, the language specified on the disc is used.
- You can also switch the audio language by touching the switch audio languages key during playback.
- The setting made here will not be affected even if the audio language is switched during playback using the switch audio languages key.

Setting the menu language
You can set the preferred language in which the menus recorded on a disc are displayed.

1 Press the home button to switch to the home display.
Setting up the video player

17

1 Press the home button to switch to the home display.

2 Touch the video setup key to open the video setup menu.

3 Touch TV Aspect on the Video Setup menu to select the TV aspect ratio.

4 Touch 0 to 9 to input a four digit code number.

5 Registering the code.

The code number is set, and the level can now be set.

6 Touch 1 to 8 to select the desired level.

7 Touch Enter.

Changing the level

You can change the set parental lock level.

1 Press the home button to switch to the home display.

2 Touch the video setup key to open the video setup menu.

3 Touch Parental on the Video Setup menu.

4 Touch 0 to 9 to input the registered code number.

5 Registering the code.

This sets the code number, and the level can now be changed.

• If you enter an incorrect code number, the icon is displayed. Touch and enter the correct code number.

• If you forget your code number, refer to if you forget your code number on page 32.

6 Touch 1 to 8 to select the desired level.

7 Touch Enter.

The new parental lock level is set.

If you forget your code number

• Press RESET.

Setting the multi-angle DVD display

The angle icon can be set so it appears on scenes where the angle can be switched.

1 Press the home button to switch to the home display.

2 Touch the video setup key to open the video setup menu.

3 Touch Multi Angle on the Video Setup menu to turn angle icon display on or off.

Setting the aspect ratio

There are two kinds of display: a wide screen display that has a width-to-height ratio (TV aspect ratio) of 16:9, and regular display that has a TV aspect of 4:3. Be sure to select the correct TV aspect for the display connected to V OUT.

• When using regular display, select either Letter Box or Pan Scan. Selecting 16:9 may result in an unnatural picture.

• If you select the TV aspect ratio, the unit’s display will change to the same setting.

Notes

• When playing discs that do not specify Pan Scan, the disc is played back in Letter Box display even if you select the Pan Scan setting. Confirm whether the disc package bears the mark.

• The TV aspect ratio cannot be changed for some discs. For details, refer to the disc’s instructions.

Setting parental lock

Some DVD video discs let you use parental lock to restrict children from viewing violent and adult-oriented scenes. You can set parental lock to the desired level.

• When you have a parental lock level set and play a disc featuring parental lock, code number input indications may be displayed. In such cases, playback will begin when the correct code number is entered.

Setting the code number and level

A code number must be registered in order to play back discs with parental lock.

• With some discs, the parental lock may be active only for certain levels of scenes. The playback of those scenes will be skipped. For details, refer to the instruction manual that came with the disc.

Changing the level

You can change the set parental lock level.

1 Press the home button to switch to the home display.

2 Touch the video setup key to open the video setup menu.

3 Touch Parental on the Video Setup menu.

4 Touch 0 to 9 to input the registered code number.

5 Registering the code.

This sets the code number, and the level can now be changed.

• If you enter an incorrect code number, the icon is displayed. Touch and enter the correct code number.

• If you forget your code number, refer to if you forget your code number on page 32.

6 Touch 1 to 8 to select the desired level.

7 Touch Enter.

The new parental lock level is set.

If you forget your code number

• Press RESET.
Setting up the video player

Setting the DivX subtitle file
You can select whether or not to display DivX external subtitles.
- The DivX subtitles will be displayed even when Custom is selected if no DivX external subtitle files exist.

1. Press the home button to switch to the home display.
2. Touch the video setup key to open the video setup menu.
3. Touch DivX® Subtitle on the Video Setup menu to select the desired subtitle setting.
   - Original – Display the DivX subtitles
   - Custom – Display the DivX external subtitles

Notes
- Up to 42 characters can be displayed on one line. If more than 42 characters are set, the line breaks and the characters are displayed on the next line.
- Up to 126 characters can be displayed on one screen. If more than 126 characters are set, the excess characters will not be displayed.

Displaying the deregistration code
If your device is already registered, deregister it by entering the deregistration code.

1. Press the home button to switch to the home display.
2. Touch the video setup key to open the video setup menu.
3. Touch DivX® VOD on the Video Setup menu.
5. Touch OK.
The deregistration is complete.

Automatic playback of DVDs
When a DVD disc with a DVD menu is inserted, this unit will cancel the menu automatically and start playback from the first chapter of the first title.

1. Press the home button to switch to the home display.
2. Touch the video setup key to open the video setup menu.
3. Touch DVD Auto Play to turn automatic playback on.
4. To turn automatic playback off, touch DVD Auto Play again.

Changing the picture adjustment
You can adjust the Brightness (brightness), Contrast (contrast), Color (color), Hue (hue), Dimmer (dimmer), and Temperature (temperature) for each source and rear view camera.
- You cannot adjust Color or Hue for the audio source.

1. Press the home button to switch to the home display.
2 Touch the system key to open the system menu.

3 If you are adjusting the Picture Adjustment, select the unit.

4 Touch any of the following touch panel keys to select the function to be adjusted.

- **Brightness** – Adjusts the black intensity
- **Contrast** – Adjusts the contrast
- **Color** – Adjusts the color saturation
- **Hue** – Adjusts the tone of color (red or green is emphasized)
- **Dimmer** – Adjusts the brightness of the display
- **Temperature** – Adjusts the color temperature, resulting in a better white balance

- You can adjust **Hue** only when the color system is set to NTSC.
- With some rear view cameras, picture adjustment may not be possible.

5 Touch ◄ or ► to adjust the selected item. Each time you touch ◄ or ►, the level of the selected item increases or decreases.

- **Dimmer** can be adjusted from +1 to +48.
- **Temperature** can be adjusted from +3 to –3.

**Notes**
- You cannot operate this function while driving.
- Different **Brightness/Contrast/Dimmer** settings can be set for when the illumination switch is on and when it is off.

### Selecting the system language

The system language can be selected. If text information such as the title name, artist name or a comment is embedded in a European language, they can also be displayed on this unit.

- The language can be changed for the following:
  - Audio menu
  - System menu
  - Video Setup menu
  - Bluetooth menu
  - Language for cautions

- Some operations on this unit are prohibited from use while driving or require careful attention when operated. In such cases, a caution will appear on the display. You can change the language for caution messages with this setting.
- If the embedded language and the selected language setting are not the same, text information may not display properly.

1 Press the home button to switch to the home display.

2 Touch the system key to open the system menu.

3 Touch **Demo mode** on the system menu to turn Demo mode on or off.

- **On** – The Demo screen appears.
- **Off** – The Demo screen does not appear.

### Setting Demo Mode

Once Demo Mode is turned on, the Demo screen appears. Refer to Demo mode on page 6.

1 Press the home button to switch to the home display.

2 Touch the system key to open the system menu.

3 Touch **Demo mode** on the system menu.

### Setting the rear output and subwoofer controller

This unit’s rear output (rear speaker leads output and RCA rear output) can be used for full-range speaker (Full) or subwoofer (Subwoofer) connection. If you switch the rear output setting to **Subwoofer**, you can connect a rear speaker lead directly to a subwoofer without using an auxiliary amp.

Initially, the unit is set for a rear full-range speaker connection (Full).

1 Turn the source off. Refer to Turning the source ON/OFF on page 7.

2 Press the home button to switch to the home display.

3 Touch the system key to open the system menu.

4 Touch **Rear Speaker** on the system menu to switch the subwoofer output or full-range speaker.

- When no subwoofer is connected to the rear output, select **Full** (full-range speaker).
- When a subwoofer is connected to the rear output, select **Subwoofer** (subwoofer).
Notes
- Even if you change this setting, there will be no output unless you turn the subwoofer output on (refer to "Using subwoofer output" on page 30).
- Both rear speaker lead outputs and RCA rear output are switched simultaneously in this setting.

Using the keyboard
Keyboard is available only in AppRadio Mode. Refer to "Setting the Keyboard" on page 20.

Setting the ever scroll
When ever scroll is set to On, recorded text information scrolls continuously in the display. Set to Off if you prefer the information to scroll just once.
1. Press the home button to switch to the home display.
2. Touch the system key to open the system menu.
3. Touch Ever Scroll on the system menu to turn ever scroll on or off.

Setting the Bluetooth audio
(Function of AVH-X7500BT)
You need to activate the Bluetooth Audio source in order to use a Bluetooth audio player.
1. Press the home button to switch to the home display.
2. Touch the system key to open the system menu.
3. Touch Bluetooth Audio on the system menu to turn Bluetooth audio on or off.

Clearing Bluetooth memory

Important
Never turn the unit off while the Bluetooth memory is being cleared.
1. Turn the source off. Refer to "Turning the source ON/OFF" on page 7.
2. Press the home button to switch to the home display.
3. Touch the system key to open the system menu.
4. Touch Bluetooth Memory Clear on the system menu.
5. Touch Clear. After selecting a desired item, a confirmation display appears. Touch OK to delete the memory. If you do not want to clear the memory, touch Cancel.

Updating Bluetooth connection software
This function is used to update this unit with the latest Bluetooth software. For about Bluetooth software and updating, refer to our website.

Displaying the Bluetooth system version
If this unit fails to operate properly, you may need to consult your dealer for repair. In such cases, you may be asked to specify the system version. Perform the following procedure to check the version on this unit.
1. Turn the source off. Refer to "Turning the source ON/OFF" on page 7.
2. Press the home button to switch to the home display.
3. Touch the system key to open the system menu.
4. Touch Bluetooth Version Information to display to the version of the Bluetooth module of this unit.

Setting the automatic open function
Refer to "Setting the automatic open function" on page 10.

Setting the rear view camera (back up camera)

CAUTION
Pioneer recommends the use of a camera which outputs mirror-reversed images. Otherwise, the screen image will appear reversed.

This unit features a function that automatically switches to the rear view camera video (REAR VIEW CAMERA IN) when a rear view camera is installed on your car and the shift lever is moved to the REVERSE (R) position. (For more details, consult your dealer.)
You can also switch the rear view image by pressing the touch panel key. For details refer to "Using the rear view on page 9.

1. After you set up the rear view camera setting, move the shift lever to REVERSE (R) and confirm that the rear view camera video is shown on the display.
2. Change this setting if the display switches to the rear view camera video by error while you are driving forward.
3. To stop watching the rear view camera video and return to the source display, press and hold MUTE.
4. Touch the RearView icon to display the rear view camera image while driving. Touch the source icon again to turn the rear view camera off. For details, refer to "Selecting a source on page 8.

1. Press the home button to switch to the home display.
2. Touch the system key to open the system menu.

1. Press the home button to switch to the home display.
2. Touch the system key to open the system menu.
Auto EQ (auto-equalizing)

The auto-equalizer automatically measures the car’s interior acoustic characteristics, and then creates an auto-equalizer curve based on that information.

- To perform this function, dedicated microphone (e.g., CD-MC20) is required.

**WARNING**

As a loud tone (noise) may be emitted from the speakers when measuring the car’s interior acoustic characteristics, never perform auto EQ while driving.

**CAUTION**

- Thoroughly check the conditions before performing auto EQ as the speakers may be damaged if these functions are performed when:
  - The speakers are incorrectly connected. (For example, when a rear speaker is connected as a subwoofer output.)
  - A speaker is connected to a power amp delivering output higher than the speaker’s maximum input power capability.

- If the microphone is placed in an unsuitable position the measurement tone may become loud and measurement may take a long time, resulting in battery drainage. Be sure to place the microphone in the specified location.

**Before operating the auto EQ function**

- Carry out auto EQ in as quiet a place as possible, with the car engine and air conditioning switched off. Also cut power to car phones or portable telephones in the car, or remove them from the car before carrying out auto EQ. Sounds other than the measurement tone (surrounding sounds, engine sound, telephones ringing etc.) may prevent correct measurement of the car interior acoustic characteristics.

- Be sure to carry out auto EQ using the optional microphone. Using another microphone may prevent measurement, or result in incorrect measurement of the car interior acoustic characteristics.

- In order to perform auto EQ, the front speaker must be connected.

- When this unit is connected to a power amp with input level control, auto EQ may not be possible if the power amp’s input level is set below the standard level.

- When this unit is connected to a power amp with an LPF, turn this LPF off before performing auto EQ. Also set the cut-off frequency for the built-in LPF of an active subwoofer to the highest frequency.

- The distance has been calculated by computer to be the optimum delay to give accurate results for the circumstances, so please continue to use this value.

- The reflected sound within the car is strong and delays occur.

- The LPF on active subwoofers or external amps delay the lower sounds.

- Auto EQ changes the audio settings as follows:
  - The fader/balance settings return to the center position. (Refer to Using fader/balance adjustment on page 29.)
  - The equalizer curve switches to Flat. (Refer to Recalling equalizer curves on page 29.)
  - The front, center and rear speakers will automatically be adjusted to a high pass filter setting.
  - Previous settings for auto EQ will be overwritten.
  - Connect a microphone extension cable (sold separately) to the AUX input in advance.

**Performing auto EQ**

1. Stop the car in a place that is quiet, close all the doors, windows and sun roof, and then turn the engine off.

   If the engine is left running, engine noise may prevent correct auto EQ.

2. Fix the optional microphone in the center of the headrest of the driver’s seat, facing forward.

   The auto EQ may differ depending on where you place the microphone. If desired, place the microphone on the front passenger seat to carry out auto EQ.

3. Turn the ignition switch to ON or ACC. If the car’s air conditioner or heater is turned on, turn it off. Noise from the fan in the air conditioner or heater may prevent correct auto EQ.

4. Press the home button to switch to the home display.

5. Touch the system key to open the system menu.

6. Touch Auto EQ Measurement to enter auto EQ measurement mode.

7. Plug the microphone into the AUX input jack on this unit.

8. Touch Start to start auto EQ.

9. When the 10-second countdown starts, get out of the car and close the door within 10 seconds.

   A measurement tone (noise) is emitted from the speakers, and auto EQ measurement begins. When auto EQ is completed, The measurement has finished. Please disconnect the microphone and then push HOME key. is displayed.
When the car’s interior acoustic characteristics cannot be measured correctly, an error message will be displayed. (Refer to Understanding auto EQ error messages on page 52.)
- It takes about nine minutes for auto EQ measurement to be completed when all the speakers are connected.
- To stop auto EQ, touch **Stop**.

10 Store the microphone carefully in the glove compartment or another safe place. If the microphone is subjected to direct sunlight for an extended period, high temperatures may cause distortion, color change or malfunction.

---

**Setting the video signal**

When you connect this unit to an AV equipment to this unit, select the suitable video signal setting.
- As this function is initially set to **Auto**, the unit will automatically adjust the video signal setting.
- You can operate this function only for the video signal input into the AV input.

1 Press the home button to switch to the home display.

2 Touch the system key to open the system menu.

3 Touch **Video Signal Setting** on the function menu.

**Video Signal Setting** items are displayed.
- **AV** – Adjusts the AV video signal
- **AUX** – Adjusts the AUX video signal
- **Camera** – Adjusts the rear view camera video signal

4 Touch ↓ or ↑ to select the desired video signal appears.
**Auto**—**PAL**—**NTSC**—**PAL-M**—**PAL-N**—**SECAM**

---

**Using the Favorite menu**

1 Display menu columns to register. Refer to Menu operations on page 29.
- You can customize menus except **Video Setup** menu.

2 Touch the star icon in the menu column for the desired menu to register the menu. The star icon for the selected menu is filled in.
- To cancel the registration, touch the star icon in the menu column again.

3 Display the favorite menu and choose a registered menu. Refer to Menu operations on page 29.

**Note**
You can register up to 12 columns.
Bluetooth connection menu operations

(Function of AVH-X7500BT)

If you are using a cellular phone that can be connected via Bluetooth wireless technology, we recommend that you use your phone to search for this unit and establish a connection between it and your phone. The PIN code is set to 0000 as default. The product name for this unit will display on your phone as the device name. For details, refer to Entering PIN code for Bluetooth wireless connection on page 38. For further details concerning the procedures for establishing Bluetooth wireless connections, refer to the instruction manual for the phone.

Pairing from this unit

1. Press the home button to switch to the home display.
2. Touch the Bluetooth key to open the Bluetooth connection menu.
3. Touch Connection to select a device.
4. Start to search.

While searching, \(\text{\(\text{\Circle}\)}\) is displayed and when available devices are found, the device names or Bluetooth device addresses (if names cannot be obtained) are displayed.

- If you want to switch between the device names and Bluetooth device addresses, touch the icon.
- Never turn the unit off while the paired Bluetooth telephone is being deleted.

Connecting to a Bluetooth device automatically

If this function is set to on, a connection between your Bluetooth device and this unit will take place automatically as soon as the two devices are less than a few meters apart. Initially, this function is set to off.

1. Press the home button to switch to the home display.
2. Touch the Bluetooth key to open the Bluetooth connection menu.
3. Touch Auto Connect to turn automatic connection on.
4. Once you turn your vehicle’s ACC switch on again, a connection is established automatically.

Switching visible unit

This function sets whether or not to make this unit visible to the other device. Initially, this function is set to on.

1. Press the home button to switch to the home display.
2. Touch the Bluetooth key to open the Bluetooth connection menu.
3. Touch Visibility to select visibility off.

Entering PIN code for Bluetooth wireless connection

To connect your Bluetooth device to this unit via Bluetooth wireless technology, you need to enter a PIN code on your Bluetooth device to verify the connection. The default code is 0000, but you can change it with this function.

1. Press the home button to switch to the home display.
2. Touch the Bluetooth key to open the Bluetooth connection menu.
4. Touch 0 to 9 to input pin code.
5. After inputting PIN code (up to 8 digits), store in this unit.

Displaying Bluetooth Device address

This unit displays its Bluetooth device address.

1. Press the home button to switch to the home display.
2. Touch the Bluetooth key to open the Bluetooth connection menu.
3. Touch Device Information to display device information.

The Bluetooth device address is displayed.
Selecting the illumination color
This unit is equipped with multiple-color illumination.

Direct selection from preset illumination colors
You can select an illumination color from the color list.

1 Press the home button to switch to the home display.
2 Touch the theme key to open the theme settings.
3 Touch Illumination and then touch a color on the list.

Customizing the illumination color

1 Press the home button to switch to the home display.
2 Touch the theme key to open the theme settings.
3 Touch Custom.
4 Display the customizing menu.
5 Touch and hold the icon to store the customized color in the memory.

Memo
Storing the customized color in the memory.

The customized color has been stored in the memory. The set color will be recalled from the memory the next time you touch the same icon.

Selecting the OSD (on-screen display) color
The OSD color can be changed.

1 Press the home button to switch to the home display.
2 Touch the theme key to open the theme settings.
3 Touch Screen.
4 Touch one of the colors on the list.

Selecting the background display
You can switch the background that is displayed when listening to a source.

1 Press the home button to switch to the home display.
2 Touch the theme key to open the theme settings.
3 Touch Background.
4 Touch the desired setting.
   • You can view the hidden settings by flicking the display.
5 Touch the color bar to customize the color.
6 Touch ◀ or ▶ to fine-tune the color.

Adjusting the response positions of the touch panels (Touch Panel Calibration)

If you feel that the touch panel keys on the screen deviate from the actual positions that respond to your touch, adjust the response positions of the touch panel. There are two adjustment methods: four-point adjustment, in which you touch four corners of the screen; and 16-point adjustment, in which you make fine-adjustments on the entire screen.

Park your car in a safe place and use this function. Do not operate it while driving.

1 Touch the + mark displayed on the screen.
2 Gently touch the center of the + mark displayed on the screen.
After you touch all the marks, the data for the adjusted position is saved.
3 Press and hold the home button to complete the adjustment.

Using an AUX source
An auxiliary device or portable device sold separately can be connected to this unit.

About AUX connection methods
You can connect auxiliary devices to this unit.

Mini pin plug cable (AUX)
When connecting an auxiliary device using a mini pin plug cable, iPods and portable audio/video players can be connected to this unit via mini pin plug cable.

• If an iPod with video capabilities is connected to this unit via 3.5 mm plug (four pole) cable (such as the CD-V150M), you can enjoy the video contents of the connected iPod.
• A portable audio/video player can be connected by using a 3.5 mm plug (four pole) with an RCA cable (sold separately). However, depending on the cable, a reverse connection between the red (right side audio) cable and yellow (video) cable may be required in order for the sound and video image to be reproduced correctly.

5 Press the home button to proceed to 16-point adjustment.
The 16-point touch panel adjustment screen appears.
   • To cancel the adjustment, press and hold the home button.
6 Gently touch the center of the + mark displayed on the screen.
After you touch all the marks, the data for the adjusted position is saved.
   • Do not turn off the engine while the data is being saved.
7 Press and hold the home button to complete the adjustment.

5 Press the home button to proceed to 16-point adjustment.
The 16-point touch panel adjustment screen appears.
   • To cancel the adjustment, press and hold the home button.
6 Gently touch the center of the + mark displayed on the screen.
After you touch all the marks, the data for the adjusted position is saved.
   • Do not turn off the engine while the data is being saved.
7 Press and hold the home button to complete the adjustment.

Using an AUX source
An auxiliary device or portable device sold separately can be connected to this unit.

About AUX connection methods
You can connect auxiliary devices to this unit.

Mini pin plug cable (AUX)
When connecting an auxiliary device using a mini pin plug cable, iPods and portable audio/video players can be connected to this unit via mini pin plug cable.

• If an iPod with video capabilities is connected to this unit via 3.5 mm plug (four pole) cable (such as the CD-V150M), you can enjoy the video contents of the connected iPod.
• A portable audio/video player can be connected by using a 3.5 mm plug (four pole) with an RCA cable (sold separately). However, depending on the cable, a reverse connection between the red (right side audio) cable and yellow (video) cable may be required in order for the sound and video image to be reproduced correctly.
Resetting the microprocessor

By pressing **RESET**, you can reset the microprocessor to its initial settings without changing the bookmark information.

The microprocessor must be reset in the following situations:
- Before using this unit for the first time after installation
- If the unit fails to operate properly
- When strange or incorrect messages appear on the display

1. Turn the ignition switch OFF.
2. Press **RESET** with a pen tip or other pointed instrument.

Refer to What’s what on page 7.

**Note**

Switch your engine ON or set the ignition switch to ACC ON before pressing **RESET** in the following situations:
- After completing connections
- When erasing all stored settings
- When resetting the unit to its initial (factory) settings

**WARNING**

- In some countries or states the viewing of images on a display inside a vehicle even by persons other than the driver may be illegal. Where such regulations apply, they must be obeyed and this unit’s DVD features should not be used.

**CAUTION**

- Do not drill a hole into the engine compartment to connect the yellow cable of the display unit to the vehicle battery. Engine vibration may eventually cause the insulation to fail at the point where the wire passes from the passenger compartment into the engine compartment. Take extra care in securing the wire at this point.
- Make sure that cables will not interfere with moving parts of the vehicle, such as the shift lever, parking brake or seat sliding mechanism.

**WARNING**

- Use speakers over 50 W (output value) and between 4 Ω to 8 Ω (impedance value). Do not use 1 Ω to 3 Ω speakers for this unit.

**Important**

- This unit cannot be installed in a vehicle without ACC (accessory) position on the ignition switch.
- The black cable is ground. When installing this unit or power amp (sold separately), make sure to connect the ground wire first. Make sure that the ground cable is properly connected to metal parts of the car body using a spade terminal sold commercially. The ground wire of the power amp and the one of this unit or any other device must be connected to the car separately with different screws. If the screw for the ground wire loosens or falls out, it could result in fire, generation of smoke or malfunction.

**WARNING**

- Use speakers over 50 W (output value) and between 4 Ω to 8 Ω (impedance value). Do not use 1 Ω to 3 Ω speakers for this unit.

**Important**

- This unit cannot be installed in a vehicle without ACC (accessory) position on the ignition switch.
- The black cable is ground. When installing this unit or power amp (sold separately), make sure to connect the ground wire first. Make sure that the ground cable is properly connected to metal parts of the car body using a spade terminal sold commercially. The ground wire of the power amp and the one of this unit or any other device must be connected to the car separately with different screws. If the screw for the ground wire loosens or falls out, it could result in fire, generation of smoke or malfunction.
— Secure the wiring with cable clamps or adhesive tape. Wrap adhesive tape around wiring that comes into contact with metal parts to protect the wiring.
— Place all cables away from moving parts, such as the shift lever and seat rails.
— Place all cables away from hot places, such as near the heater outlet.
— Do not connect the yellow cable to the battery by passing it through the hole to the engine compartment.
— Cover any disconnected cable connectors with insulating tape.
— Do not shorten any cables.
— Never cut the insulation of the power cable of this unit in order to share the power with other devices. The current capacity of the cable is limited.
— Use a fuse of the rating prescribed.
— Never wire the negative speaker cable directly to ground.
— Never band together negative cables of multiple speakers.

- When this unit is on, control signals are sent through the blue/white cable. Connect this cable to the system remote control of an external power amp or the vehicle’s auto-antenna relay control terminal (max. 300 mA 12 V DC). If the vehicle is equipped with a glass antenna, connect it to the antenna booster power supply terminal.
- Never connect the blue/white cable to the power terminal of an external power amp. Also, never connect it to the power terminal of the auto antenna. Doing so may result in battery drain or a malfunction.
Connecting the power cord

1. Clamp the lead.
2. Clamp firmly with needle-nosed pliers.

- **Yellow**: Connect to the constant 12 V supply terminal.
- **Red**: Connect to terminal controlled by ignition switch (12 V DC).
- **Black (chassis ground)**: Connect to a clean, paint-free metal location.
- **Orange/white**: Connect to lighting switch terminal.
- **Microphone (Function of AVH-X7500BT)**: 4 m (13 ft. 1 in.)

**Antenna input**

- **Microphone input (Function of AVH-X7500BT)**
- **AUX jack (3.5 ø) (AUX IN)**: Use a mini plug cable to connect with auxiliary device.
- **RGB input**
- **Wired remote input**

**Fuse (10 A)**

**Fuse resistor**

**Connection method**

- Change the initial setting of this unit. The subwoofer output of this unit is monaural.
- The position of the parking brake switch depends on the vehicle model. For details, consult the vehicle Owner’s Manual or dealer.
- If you use an equipment with Mute function, wire this lead to the Audio Mute lead on that equipment. If not, keep the Audio Mute lead free of any connections.

- With a 2 speaker system, do not connect anything to the speaker leads that are not connected to speakers.
- Used to detect the ON/OFF status of the parking brake. This lead must be connected to the power supply side of the parking brake switch.

- With a 2 speaker system, do not connect anything to the speaker leads that are not connected to speakers.

**Navigation system (AVIC-U250(sold separately))**

- Connect the 26 pin cable in the direction indicated in the figure.

**26 pin cable (Supplied with navigation unit)**

- Please contact your dealer to inquire about the connectable navigation unit.

**Microphone input**

**Antenna input**

**AUX IN**

**Navigation system (AVIC-U250(sold separately))**

**RGB input**

**Microphone input**

When connecting to separately sold power amp

- **Rear output** (REAR OUTPUT)
- **Front output** (FRONT OUTPUT)
- **Subwoofer output** (SUBWOOFER OUTPUT)
- **Power amp (sold separately)**
- **System remote control**

Connect with RCA cables (sold separately)

Perform these connections when using the optional amplifier.

When connecting the external video component and the display

- **Rear monitor output** (REAR MONITOR OUTPUT)
- **RCA cable (sold separately)**
- **Display with RCA input jacks (sold separately)**
- **13 cm (5-1/8 in.)**
- **17 cm (6-3/4 in.)**
- **Audio inputs (AUDIO INPUT)**
- **Video input (VIDEO INPUT)**

**WARNING**

- Never install a rear display in a location that is visible to the driver while the vehicle is in motion.

It is necessary to change **AV Input** in the system menu when connecting the external video component. Refer to Setting AV input on page 33.

This product’s rear video output is for connection of a display to enable passengers in the rear seats to watch the DVD, etc.

- **Display with RCA input jacks (sold separately)**
- **RCA cables (sold separately)**
- **To video output**
- **To audio outputs**

Connect to system control terminal of the power amp (max. 300 mA 12 V DC).

External video component (sold separately)

**WARNING**

- Never install a rear display in a location that is visible to the driver while the vehicle is in motion.
When connecting with a rear view camera

If you switch the shift lever to REVERSE (R), the display on this unit will automatically switch to the rear view image. You need to set the Camera Polarity properly in the system unit to use. For details on settings, refer to Setting the rear view camera (back up camera) on page 35. You can also switch to the rear view image by pressing the touch panel key. For details, refer to Using the rear view on page 9.

**WARNING**
USE INPUT ONLY FOR REVERSE OR MIRROR IMAGE REAR VIEW CAMERA. OTHER USE MAY RESULT IN INJURY OR DAMAGE.

**CAUTION**
- You must use a camera which outputs mirror reversed images.
- The screen image may appear reversed.
- The rear view camera function is to be used as an aid to keep an eye on trailers, or while backing up. Do not use for entertainment purposes.
- Objects in the rear view may appear closer or more distant than they actually are.

---

**iPod with lightning connector**

**When connecting with Lightning to USB Cable**

- Connect to separately sold USB device.
- For details of how to connect the separately sold VGA/USB interface cable (CD-IV202AV), refer to the VGA/USB interface cable manual.

---

**When connecting with optional CD-IV202AV cable**

- Connect to separately sold USB device.
- For details of how to connect the separately sold VGA/USB interface cable (CD-IV202AV), refer to the VGA/USB interface cable manual.
iPod with 30-pin connector
When connecting with optional CD-IU201V cable

When connecting with optional CD-IU201S cable

Notes
- Check all connections and systems before final installation.
- Do not use unauthorized parts as this may cause malfunctions.
- Consult your dealer if installation requires drilling of holes or other modifications to the vehicle.
- Do not install this unit where:
  - it may interfere with operation of the vehicle.
  - it may cause injury to a passenger as a result of a sudden stop.
- The semiconductor laser will be damaged if it overheats. Install this unit away from hot places such as near the heater outlet.
- Optimum performance is obtained when the unit is installed at an angle of less than 30°.
- When installing, to ensure proper heat dispersal when using this unit, make sure you leave ample space behind the rear panel and wrap any loose cables so they are not blocking the vents.
- The cords must not cover up the area shown in the figure below. This is necessary to allow the amplifiers to radiate freely.

DIN front/rear-mount
This unit can be properly installed using either front-mount or rear-mount installation. Use commercially available parts when installing.

DIN Front-mount
1 Decide the position of the side brackets. When installing in a shallow space, change the position of side brackets (small).
Installation

1. Side bracket (small)
2. Flush surface screw (5 mm × 6 mm)

2. Install the unit into the dashboard.
   Insert the mounting sleeve into the dashboard. And then secure the mounting sleeve by using a screwdriver to bend the metal tabs (90°) into place.

2. Tighten two screws on each side.
   Use any of binding screws (4 mm × 3 mm), binding screws (5 mm × 6 mm) or flush surface screws (5 mm × 6 mm), depending on the shape of screw holes in the bracket.

1. Use binding screws (4 mm × 3 mm) only.

2. Dashboard or console
3. Factory radio mounting bracket

Note
In some types of vehicles, discrepancy may occur between the unit and the dashboard. If this happens, use the supplied frame to fill the gap.

Removing the unit
Extend top and bottom of the trim ring outwards to remove the trim ring. And then loosen the screws (2 mm × 3 mm) to remove the mounting sleeve.

Installing the microphone
(Function of AVH-X7500BT)

CAUTION
It is extremely dangerous to allow the microphone lead to become wound around the steering column or shift lever. Be sure to install the unit in such a way that it will not obstruct driving.

Note
Install the microphone in a position and orientation that will enable it to pick up the voice of the person operating the system.

When installing the microphone on the sun visor
1. Fit the microphone lead into the groove.
   1. Microphone lead
   2. Groove

2. Install the microphone clip on the sun visor.
   With the sun visor up, install the microphone clip. (Lowering the sun visor reduces the voice recognition rate.)

Fastening the front panel
If you do not plan to detach the front panel, the front panel can be fastened with supplied screw.

1. Screw
   2. Dashboard or console
   3. Factory radio mounting bracket

Note
In some types of vehicles, discrepancy may occur between the unit and the dashboard. If this happens, use the supplied frame to fill the gap.
Installation

When installing the microphone on the steering column

1 Detach the microphone base from the microphone clip.
   To detach the microphone base from the microphone clip, slide the microphone base.

2 Install the microphone on the steering column.
   - Detach the microphone base from the microphone clip.
   - To detach the microphone base from the microphone clip, slide the microphone base.
   - Install the microphone on the rear side of the steering column.
   - Clamp
     Use separately sold clamps to secure the lead where necessary inside the vehicle.

Adjusting the microphone angle

- Double-sided tape
- Install the microphone on the rear side of the steering column.
- Clamp
  Use separately sold clamps to secure the lead where necessary inside the vehicle.

The microphone angle can be adjusted.

### Unplayable Disc
This type of disc cannot be played on this unit. Replace the disc.

The inserted disc contains a high definition DivX/MPEG-1/ MPEG-2/ MPEG-4 file. Select a file that can be played.

This unit’s flash memory used as the temporary storage area is full. Select a file that can be played.

This unit’s DivX registration code has not been authorized by the DivX VOD contents provider. Register this unit to the DivX VOD contents provider.

This type of file cannot be played on this unit. Select a file that can be played.

Sometimes there is a delay between the start of playback and when you start to hear any sound. Wait until the message disappears and you hear sound.

All the files on the connected USB storage device are embedded with DRM. Replace the USB storage device.

The connected USB device is not supported by this unit. Connect a USB portable audio player or USB memory that is USB Mass Storage Class compliant.

The USB device is not formatted with FAT12, FAT16 or FAT32. The connected USB device should be formatted with FAT12, FAT16 or FAT32.

Check USB

The USB connector or USB cable has short-circuited. Check that the USB connector or USB cable is not caught in something or damaged.

The connected USB storage device consumes more than maximum allowable current. Disconnect the USB portable audio player/USB memory and do not use it. Turn the ignition switch to OFF, then to ACC or ON and then connect a compliant USB portable audio player/USB memory.

### External storage device (USB)

### Message | Cause | Action

The connected USB device is not supported by this unit. Connect a USB portable audio player or USB memory that is USB Mass Storage Class compliant.

The USB device is not formatted with FAT12, FAT16 or FAT32. The connected USB device should be formatted with FAT12, FAT16 or FAT32.

Check USB

The USB connector or USB cable has short-circuited. Check that the USB connector or USB cable is not caught in something or damaged.

The connected USB storage device consumes more than maximum allowable current. Disconnect the USB portable audio player/USB memory and do not use it. Turn the ignition switch to OFF, then to ACC or ON and then connect a compliant USB portable audio player/USB memory.

### Protect

All the files on the inserted disc are embedded with DRM.

The inserted disc contains DRM protected files.

The protected files are skipped.

The USB device is not formatted with FAT12, FAT16 or FAT32. The connected USB device should be formatted with FAT12, FAT16 or FAT32.

Check USB

The USB connector or USB cable has short-circuited. Check that the USB connector or USB cable is not caught in something or damaged.

The connected USB storage device consumes more than maximum allowable current. Disconnect the USB portable audio player/USB memory and do not use it. Turn the ignition switch to OFF, then to ACC or ON and then connect a compliant USB portable audio player/USB memory.

### Skipped

The inserted disc contains DRM protected files.

The protected files are skipped.

The USB device is not formatted with FAT12, FAT16 or FAT32. The connected USB device should be formatted with FAT12, FAT16 or FAT32.

Check USB

The USB connector or USB cable has short-circuited. Check that the USB connector or USB cable is not caught in something or damaged.

The connected USB storage device consumes more than maximum allowable current. Disconnect the USB portable audio player/USB memory and do not use it. Turn the ignition switch to OFF, then to ACC or ON and then connect a compliant USB portable audio player/USB memory.

### TEMP

The temperature of the unit is outside the normal operating range.

Wait until the unit returns to a temperature within the normal operating limits.

The connected USB storage device consumes more than maximum allowable current. Disconnect the USB portable audio player/USB memory and do not use it. Turn the ignition switch to OFF, then to ACC or ON and then connect a compliant USB portable audio player/USB memory.

### Unplayable File

This type of file cannot be played on this unit. Select a file that can be played.

There are no songs. Transfer the audio files to the USB portable audio player/USB memory and connect.

Security for the connected USB memory is enabled. Follow the USB memory instructions to disable security.

Sometimes there is a delay between the start of playback and when you start to hear any sound. Wait until the message disappears and you hear sound.

All the files on the connected USB storage device are embedded with DRM. Replace the USB storage device.

The connected USB device is not supported by this unit. Connect a USB portable audio player or USB memory that is USB Mass Storage Class compliant.

The USB device is not formatted with FAT12, FAT16 or FAT32. The connected USB device should be formatted with FAT12, FAT16 or FAT32.

Check USB

The USB connector or USB cable has short-circuited. Check that the USB connector or USB cable is not caught in something or damaged.

The connected USB storage device consumes more than maximum allowable current. Disconnect the USB portable audio player/USB memory and do not use it. Turn the ignition switch to OFF, then to ACC or ON and then connect a compliant USB portable audio player/USB memory.

### Video frame rate not supported

DivX file’s frame rate is more than 30fps. Select a file that can be played.

The connected USB storage device consumes more than maximum allowable current. Disconnect the USB portable audio player/USB memory and do not use it. Turn the ignition switch to OFF, then to ACC or ON and then connect a compliant USB portable audio player/USB memory.

### Audio Format not supported

This type of file is not supported on this unit. Select a file that can be played.

The connected USB storage device consumes more than maximum allowable current. Disconnect the USB portable audio player/USB memory and do not use it. Turn the ignition switch to OFF, then to ACC or ON and then connect a compliant USB portable audio player/USB memory.

### Incompatible USB

The USB device is not supported by this unit. Connect a USB portable audio player or USB memory that is USB Mass Storage Class compliant.

The USB device is not formatted with FAT12, FAT16 or FAT32. The connected USB device should be formatted with FAT12, FAT16 or FAT32.

Check USB

### Understanding auto EQ error messages

When correct measurement of the car’s interior acoustic characteristics is not possible using auto EQ, an error message may appear on the display. In such cases, refer to the table below to see what the problem is and how it may be corrected. After checking, try again.

<table>
<thead>
<tr>
<th>Message</th>
<th>Cause</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>Communication error occurred. Please reconnect your device.</td>
<td>If there is no ACK after 10 attempted retries at 750 ms, the accessory should assume that communication is interrupted and disconnect from PandoraLink.</td>
<td>Please reconnect your iPhone and try again.</td>
</tr>

### Understanding messages

**Screen image may appear reversed.**

Pioneer recommends the use of a camera which outputs mirror-reversed images. Otherwise, the screen image will appear reversed.

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

### Additional information

- **LPCM** indicates that the digital format is Linear PCM.
- **48k16** indicates the sampling frequency.
- **DTS** indicates that the digital format is DTS.
- **1 ch** indicates the audio channel.
- **2 ch** indicates that a disc with PBC On is being played.
- **Multi ch** indicates that a cellular phone is connected.
- **1+1ch** indicates that an incoming call has been received and has not been checked yet.

## Additional information

- ![Song title](song_title.png) **Song title** shows the song title of the song currently being played for MP3/WMA/AAC/WAV files.
- ![Artist name](artist_name.png) **Artist name** shows the artist name when receiving the tag information.
- ![Folder name](folder_name.png) **Folder name** shows the folder name of the folder containing the MP3/WMA/AAC/WAV file currently being played.
- ![File name](file_name.png) **File name** shows the file name of the MP3/WMA/AAC/WAV file currently being played.
- ![Preset number](preset_number.png) **Preset number** shows the preset number of the station currently being tuned in to.
- ![Channel](channel.png) **Channel** shows the station name currently tuned in to.
- ![Comment](comment.png) **Comment** shows the comment currently being played.
- ![Title number](title_number.png) **Title number** shows the title number currently being played.
- ![Chapter number](chapter_number.png) **Chapter number** shows the chapter number currently being played.
- ![Replay time](replay_time.png) **Replay time** shows the replay time currently being played.
- ![Genre](genre.png) **Genre** shows the genre of the track/song currently being played.
- ![Composer name](composer_name.png) **Composer name** shows the composer name.
- ![Folder](folder.png) **Folder** shows the folder name of the folder containing the MP3/WMA/AAC/WAV file currently being played.
- ![File](file.png) **File** shows the file name of the MP3/WMA/AAC/WAV file currently being played.
- ![Artist](artist.png) **Artist** shows the artist name when receiving the tag information.
- ![Title](title.png) **Title** shows the title of the song currently being played for MP3/WMA/AAC/WAV files.
- ![Channel](channel.png) **Channel** shows the channel currently being tuned in to.
- ![Preset number](preset_number.png) **Preset number** shows the preset number of the station currently being tuned in to.
- ![BSM](bsm.png) **BSM** shows when radio signal is received.
- ![Auto EQ](auto_eq.png) **Auto EQ** indicates that Auto EQ is on.
- ![Home](home.png) **Home** shows home phone information.
- ![Office](office.png) **Office** shows office phone information.
- ![Other](other.png) **Other** shows other phone information.
- ![Call](call.png) **Call** shows the incoming call has been received and has not been checked yet.
Handling guidelines

**Discs and player**

Use discs featuring any of the following logos.

![Compact Disc](image)

Use 12-cm discs. Do not use 8-cm discs or an adapter for 8-cm discs.

Use only conventional, fully circular discs. Do not use shaped discs.

Do not insert anything other than a DVD-R/RW or CD-R/RW into the disc loading slot.

Do not use cracked, chipped, warped, or otherwise damaged discs as they may damage the player.

Unfinalized CD-R/RW discs cannot be played back.

Do not touch the recorded surface of the discs.

Store discs in their cases when not in use.

Do not attach labels, write on or apply chemicals to the surface of the discs.

To clean a disc, wipe the disc with a soft cloth outward from the center.

Condensation may temporarily impair the player’s performance. Let it rest for about one hour to adjust to a warmer temperature. Also, wipe any damp discs off with a soft cloth.

Playback of discs may not be possible because of disc characteristics, disc format, recorded application, playback environment, storage conditions, and so on.

Road shocks may interrupt disc playback.

Certain functions may not be available for some DVD video discs.

It may not be possible to play back some DVD video discs.

It is not possible to play back DVD-RAM discs.

This unit is not compatible with discs recorded in AVCHD (Advanced Video Codec; High Definition) format. Do not insert AVCHD discs as you may not be able to eject the disc.

When using discs that can be printed on label surfaces, check the instructions and the warnings of the discs. Depending on the discs, inserting and ejecting may not be possible. Using such discs may result in damage to this equipment.

Do not attach commercially available labels or other materials to the discs.

- The discs may warp making the disc unplayable.
- The labels may come off during playback and prevent ejection of the discs, which may result in damage to the equipment.

**External storage device (USB)**

Depending on the external storage device (USB), the following problems may occur.

- Operations may vary.
- The storage device may not be recognized.
- Files may not be played back properly.

**USB storage device**

Connections via USB hub are not supported.

Do not connect anything other than a USB storage device.

Firmly secure the USB storage device when driving. Do not let the USB storage device fall onto the floor, where it may become jammed under the brake or accelerator pedal.

Depending on the USB storage device, the device may cause noise to occur in the radio.

Copyright protected files that are stored in the USB devices cannot be played back.

You cannot connect a USB portable audio player/USB memory to this unit via USB hub.

Partitioned USB memory is not compatible with this unit.

Depending on the kind of USB portable audio player/USB memory you use, the device may not be recognized or audio files may not be played back properly.

Do not leave the USB portable audio player/USB memory in direct sunlight for extended amounts of time. Doing so may cause the device to malfunction from the extreme rise in temperature.

**iPod**

To ensure proper operation, connect the dock connector cable from the iPod directly to this unit.

Firmly secure the iPod when driving. Do not let the iPod fall onto the floor, where it may become jammed under the brake or accelerator pedal.
Additional information

About iPod settings
- When an iPod is connected, this unit changes the EQ (equalizer) setting of the iPod to off in order to optimize the acoustics. When you disconnect the iPod, the EQ returns to the original setting.
- You cannot set Repeat to off on the iPod when using this unit. Repeat is automatically changed to All when the iPod is connected to this unit.

Incompatible text saved on the iPod will not be displayed by the unit.

DVD-R/RW discs
Unfinalized DVD-R/RW discs which have been recorded in the Video format (video mode) cannot be played back.
Playback of DVD-R/RW discs may not be possible, due to disc characteristics, scratches or dirt on the disc, or dirt, condensation, etc., on the lens of this unit.
Depending on the application settings and the environment, playback of discs recorded on a computer may not be possible. (For details, contact the manufacturer of the application.)

CD-R/RW discs
When CD-R/RW discs are used, playback is possible only for discs which have been finalized.
Playback of CD-R/RW discs recorded on a music CD recorder or a computer may not be possible due to disc characteristics, scratches or dirt on the disc, or dirt, condensation, etc., on the lens of this unit.
Depending on the application settings and the environment, playback of discs recorded on a computer may not be possible. (For details, contact the manufacturer of the application.)

Playback of CD-R/RW discs may become impossible in case of direct exposure to sunlight, high temperatures, or the storage conditions in the vehicle. Titles and other text information recorded on a CD-R/RW disc may not be displayed by this unit (in the case of audio data (CD-DA)).

DualDiscs
DualDiscs are two-sided discs that have a recordable CD for audio on one side and a recordable DVD for video on the other.
Playback of the DVD side is possible with this unit. However, since the CD side of DualDiscs is not physically compatible with the general CD standard, it may not be possible to play the CD side with this unit.
Frequent loading and ejecting of a DualDisc may result in scratches on the disc. Serious scratches can lead to playback problems on this unit. In some cases, a DualDisc may become stuck in the disc loading slot and will not eject. To prevent this, we recommend you refrain from using DualDisc with this unit.
Please refer to the information from the disc manufacturer for more detailed information about DualDiscs.

DivX video files
Depending on the composition of the file information, such as the number of audio streams or file size, there may be a slight delay when playing back discs.
Some special operations may be prohibited due to the composition of the DivX files.
Only DivX files downloaded from a DivX partner site are guaranteed for proper operation. Unauthorized DivX files may not operate properly.

DRM rental files cannot be operated until playback is started.
Recommended file size: 2 GB or less with a transmission rate of 2 Mbps or less.
The ID code of this unit must be registered to a DivX VOD provider in order to playback DivX VOD files. For information on ID codes, refer to Displaying the DivX VOD registration code on page 53.
For more details about DivX, visit the following site:
http://www.divx.com/

MPEG-1/MPEG-2/MPEG-4 video files
Elapsed playback time may not be displayed correctly.

Audio compatibility (USB)
WAV
File extension: .wav
Quantization bits: 8 and 16 (LPCM), 4 (MS ADPCM)
Sampling frequency: 16 kHz to 48 kHz (LPCM), 22.05 kHz and 44.1 kHz (MS ADPCM)

Compressed audio compatibility (disc, USB)
WMA
File extension: .wma
Bit rate: 48 kbps to 320 kbps (CBR), VBR

MP3
File extension: .mp3
Bit rate: 8 kbps to 320 kbps (CBR), VBR
Sampling frequency: 8 kHz to 48 kHz (32 kHz, 44.1 kHz, 48 kHz for emphasis)
Compatible ID3 tag version: 1.0, 1.1, 2.2, 2.3, 2.4
ID3 tag Version 2.x is given priority over Version 1.x
M3u playlist: Not compatible
MP3 (MP3 interactive), mp3 PRO: Not compatible

AAC
Compatible format: AAC encoded by iTunes
File extension: .m4a
Sampling frequency: 11.025 kHz to 48 kHz
Bit rate: 16 kbps to 320 kbps
Apple Lossless: Not compatible
AAC file bought from the iTunes Store (.m4p file extension): Not compatible

DivX compatibility (disc)
Compatible format: DivX video format implemented in relation to DivX standards
File extensions: .avi or .divx
DivX Ultra format: Not compatible
DivX HD format: Not compatible

DivX video compatibility (disc)
Compatible format: DivX video format implemented in relation to DivX standards
File extensions: .avi or .divx
DivX Ultra format: Not compatible
DivX HD format: Not compatible
DivX files without video data: Not compatible
DivX plus: Not compatible
Compatible audio codec: MP2, MP3, Dolby Digital
LPCM: Compatible
Bit rate: 8 kbps to 320 kbps (CBR), VBR
Sampling frequency: 8 kHz to 48 kHz
Compatible external subtitle file extension: .srt

MPEG-1/MPEG-2/MPEG-4 video (disc)
File extensions: .mpg or .mpeg (MPEG-1/MPEG-2), .avi (MPEG-4)
Compatible audio codec: MP2 (MPEG-1/MPEG-2), MP2, MP3, Dolby Digital (MPEG-4)
H.264 (MPEG-4 AVC): Compatible
LPCM: Not compatible
Bit rate: 8 kbps to 320 kbps (CBR), VBR
Sampling frequency: 8 kHz to 48 kHz

Supplemental information
Some characters in a file name (including the file extension) or a folder name may not be displayed.
This unit may not work properly depending on the application used to encode WMA files.
There may be a slight delay at the start of playback of audio files embedded with image data or audio files stored on a USB storage device that has numerous folder hierarchies.

Disc (CD/DVD)
Playable folders: up to 99 for CD-R/RW
Playable folders: up to 700 for DVD-R/RW
Playable files: up to 999 for CD-R/RW
Playable files: up to 3,500 for DVD-R/RW
File system: ISO 9660 Level 1 and 2, Romeo, Joliet, UDF 1.02 (DVD-R/RW)
Multi-session playback: Compatible
Packet write data transfer: Not compatible
Regardless of the length of blank sections between the songs from the original recording, compressed audio discs play with a short pause between songs.

External storage device (USB)
Playable folders: up to 1,500
Playable files: up to 15,000
Playback of copyright-protected files: Not compatible
Partitioned external storage device (USB): Only the first playable partition can be played.
There is no compatibility for Multi Media Cards (MMC).

Additional information

CAUTION
- Pioneer accepts no responsibility for data lost on the USB memory/USB portable audio player even if that data is lost while using this unit.
- Pioneer cannot guarantee compatibility with all USB mass storage devices and assumes no responsibility for any loss of data on media players, smart phones, or other devices while using this product.

iPod compatibility
This unit supports only the following iPod models. Supported iPod software versions are shown below. Older versions may not be supported. Made for
- iPod touch 5th generation (software version 6.0.1)
- iPod touch 4th generation (software version 5.1.1)
- iPod touch 3rd generation (software version 5.1.1)
- iPod touch 2nd generation (software version 4.2.1)
- iPod touch 1st generation (software version 3.1.3)
- iPod classic 160GB (software version 2.0.4)
- iPod classic 120GB (software version 2.0.1)
- iPod classic (software version 1.1.2)
- iPod with video (software version 1.3)
- iPod nano 7th generation (software version 1.0.1)
- iPod nano 6th generation (software version 1.2)
- iPod nano 5th generation (software version 1.0.2)
- iPod nano 4th generation (software version 1.0.4)
- iPod nano 3rd generation (software version 1.1.3)
- iPod nano 2nd generation (software version 1.1.3)
- iPod nano 1st generation (software version 1.3.1)
- iPhone 5 (software version 6.0.1)
- iPhone 4S (software version 5.1.1)
- iPhone 4 (software version 5.1.1)
- iPhone 3GS (software version 5.1.1)
- iPhone 3G (software version 4.2.1)
- iPhone (software version 3.1.3)

Depending on the generation or version of the iPod, some functions may not be available.
Operations may vary depending on the software version of iPod.
About the file/format compatibility, refer to the iPod manuals.
Audiobook, Podcast: Compatible

CAUTION
Pioneer accepts no responsibility for data lost on the iPod, even if that data is lost while this unit is used.

About iTunes tagging
This function can be performed with the following iPod models.
- iPod touch 4th generation
- iPod touch 3rd generation
- iPod touch 2nd generation
- iPod touch 1st generation
- iPod classic 160GB
- iPod classic 120GB
- iPod classic
- iPod with video
- iPod nano 6th generation
- iPod nano 5th generation
- iPod nano 4th generation
- iPod nano 3rd generation
- iPhone 4S
- iPhone 4
- iPhone 3GS
- iPhone 3G
- iPhone

Supplemental information
Some characters in a file name (including the file extension) or a folder name may not be displayed.
This unit may not work properly depending on the application used to encode WMA files.
There may be a slight delay at the start of playback of audio files embedded with image data or audio files stored on a USB storage device that has numerous folder hierarchies.
Additional information

The song information (tag) can be saved from the broadcasting station to your iPod. The songs will show up in a playlist called “Tagged playlist” in iTunes the next time you sync your iPod. Then you can directly buy the songs you want from the iTunes Store. The tagged songs and the song that you can buy from the iTunes Store may be different. Make sure to confirm the song before you make the purchase.

If you cannot use this function normally, update your iPod firmware.

Sequence of audio files
The user cannot assign folder numbers and specify playback sequences with this unit.

Example of a hierarchy

<table>
<thead>
<tr>
<th>Level 3</th>
<th>Level 2</th>
<th>Level 1</th>
</tr>
</thead>
<tbody>
<tr>
<td>➜</td>
<td>➜</td>
<td>➜</td>
</tr>
<tr>
<td>➜</td>
<td>➜</td>
<td>➜</td>
</tr>
<tr>
<td>➜</td>
<td>➜</td>
<td>➜</td>
</tr>
<tr>
<td>➜</td>
<td>➜</td>
<td>➜</td>
</tr>
</tbody>
</table>

Disc
Folder selection sequence or other operation may differ depending on the encoding or writing software.

External storage device (USB)
The playback sequence is the same as the recorded sequence in the external storage device (USB).

To specify the playback sequence, the following method is recommended.

- Create a file name that includes numbers that specify the playback sequence (e.g., 001xxx.mp3 and 099yyy.mp3).
- Put those files into a folder.
- Save the folder that contains the files to the external storage device (USB).

However, depending on the system environment, you may not be able to specify the playback sequence. For USB portable audio players, the sequence is different and depends on the player.

Using the display correctly

**CAUTION**

- If liquid or foreign matter should get inside this unit, turn off the power immediately and consult your dealer or the nearest authorized PIONEER Service Station. Do not use the unit in this condition because doing so may result in fire, electric shock, or other failure.
- If you notice smoke, a strange noise or smell, or any other abnormal signs from the display, turn off the power immediately and consult your dealer or the nearest authorized PIONEER Service Station. Using this unit in this condition may result in permanent damage to the system.
- Do not disassemble or modify this unit, as there are high-voltage components inside which may cause electric shock. Be sure to consult your dealer or the nearest authorized PIONEER Service Station for internal inspection, adjustments, or repairs.

Handling the display

- Never touch the screen with anything besides your finger when operating the touch panel function. The screen can scratch easily.
- When the display is subjected to direct sunlight for a long period of time, it will become very hot resulting in possible damage to the LCD screen. You should avoid exposing the display unit to direct sunlight as much as possible.
- The display should be used within the temperature range of 14 °F to 140 °F. At temperatures higher or lower than this operating temperature range, the display may not operate normally.
- The LCD screen is exposed in order to increase its visibility within the vehicle. Do not press it strongly on it as this may damage it.
- Do not push the LCD screen forcefully as this may scratch it.

Liquid crystal display (LCD) screen

- Heat from the heater may damage the LCD screen, and cool air from the cooler may cause moisture to form inside the display resulting in possible damage.
- Small black dots or white dots (bright dots) may appear on the LCD screen. These are due to the characteristics of the LCD screen and do not indicate a malfunction.
- When using a cellular phone, keep the antenna away from the display to prevent disruption of the video image by the appearance of spots, colored stripes, etc.

LED (light-emitting diode) backlight

- At low temperatures, using the LED backlight may increase image lag and degrade the image quality due to the characteristics of the LCD screen. Image quality will improve with an increase in temperature.
- To protect the LED backlight, the display will darken in the following environments:
  - In the direct sunlight
  - Near the heater vent

- The product lifetime of the LED backlight is more than 10,000 hours. However, it may decrease if used in high temperatures.
- If the LED backlight reaches the end of its product lifetime, the screen will become dark and the image will no longer be projected. In such cases, please consult your dealer or the nearest authorized PIONEER Service Station.

Keeping the display in good condition

- When removing dust from the screen or cleaning the display, first turn the system power off, then wipe with a soft dry cloth.
- When wiping the screen, take care not to scratch the surface. Do not use harsh or abrasive chemical cleaners.

Bluetooth profiles

In order to use Bluetooth wireless technology, devices must be able to interpret certain profiles. This unit is compatible with the following profiles.

- GAP (Generic Access Profile)
- SDP (Service Discovery Protocol)
- OPP (Object Push Profile)
- HFP (Hands Free Profile)
- HSP (Head Set Profile)
- PBAP (Phone Book Access Profile)
- A2DP (Advanced Audio Distribution Profile)
- AVRCP (Audio/Video Remote Control Profile) 1.3
- SPP (Serial Port Profile) 1.1

An independent license for such use is required. For details, please visit http://www.mp3licensing.com.

WMA

Windows Media is either a registered trademark or trademark of Microsoft Corporation in the United States and/or other countries. This product includes technology owned by Microsoft Corporation and cannot be used or distributed without a license from Microsoft Licensing, Inc.

iPod & iPhone

iPod, iPod classic, iPod nano, and iPod touch are trademarks of Apple Inc., registered in the U.S. and other countries.

Lightning is a trademark of Apple Inc. “Made for iPod” and “Made for iPhone” mean that an electronic accessory has been designed to connect specifically to iPod or iPhone, respectively, and has been certified by the developer to meet Apple performance standards. Apple is not responsible for the operation of this device or its compliance with safety and regulatory standards. Please note that the use of this accessory with iPod or iPhone may affect wireless performance.

Android™ & Google Play

Android and Google Play are trademarks of Google Inc.

Dolby Digital

Manufactured under license from Dolby Laboratories. Dolby and the double-D symbol are trademarks of Dolby Laboratories.

DivX

DivX®, DivX Certified® and associated logos are trademarks of Rovi Corporation or its subsidiaries and are used under license.

ABOUT DIVX VIDEO: DivX® is a digital video format created by DivX, LLC, a subsidiary of Rovi Corporation. This is an official DivX Certified® device that plays DivX video. Visit divx.com for more information and software tools to convert your files into DivX videos.

ABOUT DIVX VIDEO-ON-DEMAND: This DivX Certified® device must be registered in order to play purchased DivX Video-on-Demand (VOD) movies. To obtain your registration code, locate the DivX VOD section in Displaying the VOD registration code. Go to vod.divx.com for more information on how to complete your registration.

Pandora® internet radio

PANDORA, the PANDORA logo, and the Pandora trade dress are trademarks or registered trademarks of Pandora Media, Inc. Used with permission.

MIXTRAX

MIXTRAX is a trademark of the PIONEER CORPORATION.

This code is released under the libpng license. libpng versions 1.2.6, August 15, 2004, through 1.5.0, January 6, 2011, are Copyright (c) 2004, 2006-2010 Glenn Randers-Pehrson, and are distributed according to the same disclaimer and license as libpng-1.2.5 with the following individual added to the list of Contributing Authors:

Cosmin Truta

libpng versions 1.0.7, July 1, 2000, through 1.2.5 - October 3, 2002, are Copyright (c) 2000-2002 Glenn Randers-Pehrson, and are distributed according to the same disclaimer and license as libpng-1.0.6 with the following individuals added to the list of Contributing Authors:

Simon-Pierre Cadieux
Eric S. Raymond
Gilles Voillant
and with the following additions to the disclaimer:

There is no warranty against interference with your enjoyment of the library or against infringement. There is no warranty that our efforts or the library will fulfill any of your particular purposes or needs. This library is provided with all faults, and the entire risk of satisfactory quality, performance, accuracy, and effort is with the user.

libpng versions 0.97, January 1998, through 1.0.6, March 20, 2000, are Copyright (c) 1998, 1999 Glenn Randers-Pehrson, and are distributed according to the same disclaimer and license as libpng-0.96, with the following individuals added to the list of Contributing Authors:

Tom Lane
Glenn Randers-Pehrson
Willem van Schaik

libpng versions 0.89, June 1996, through 0.96, May 1997, are Copyright (c) 1996, 1997 Andreas Dilger Distributed according to the same disclaimer and license as libpng-0.88, with the following individuals added to the list of Contributing Authors:

John Bowler
John Bowler
Kevin Bracey
Sam Bushell
Magnus Holmgren
Greg Roelofs
Tom Tanner

libpng versions 0.5, May 1995, through 0.88, January 1996, are Copyright (c) 1995, 1996 Guy Eric Schalnat, Group 42, Inc.
For the purposes of this copyright and license, "Contributing Authors" is defined as the following set of individuals:

Andreas Dilger
Dave Martindale
Guy Eric Schalnat
Paul Schmidt
Tim Wegner

The PNG Reference Library is supplied "AS IS". The Contributing Authors and Group 42, Inc. disclaim all warranties, expressed or implied, including, without limitation, the warranties of merchantability and of fitness for any purpose. The Contributing Authors and Group 42, Inc. assume no liability for direct, indirect, incidental, special, exemplary, or consequential damages, which may result from the use of the PNG Reference Library, even if advised of the possibility of such damage. Permission is hereby granted to use, copy, modify, and distribute this source code, or portions hereof, for any purpose, without fee, subject to the following restrictions:

1. The origin of this source code must not be misrepresented.
2. Altered versions must be plainly marked as such and must not be misrepresented as being the original source.
3. This Copyright notice may not be removed or altered from any source or altered source distribution.

The Contributing Authors and Group 42, Inc. specifically permit, without fee, and encourage the use of this source code as a component to supporting the PNG file format in commercial products. If you use this source code in a product, acknowledgment is not required but would be appreciated.

A "png_get_copyright" function is available, for convenient use in "about" boxes and the like: printf("%s", png_get_copyright(NULL));

Also, the PNG logo (in PNG format, of course) is supplied in the files "pngbar.png" and "pngbar.jpg (88x31) and "pngnow.png" (98x31). Libpng is OSI Certified Open Source Software. OSI Certified Open Source is a certification mark of the Open Source Initiative.

## Additional information
Specifications

General
Power source ................... 14.4 V DC (10.8 V to 15.1 V allowable)
Grounding system ............ Negative type
Maximum current consumption ................................... 10.0 A
Dimensions (W × H × D):
D
Chassis .............. 178 mm × 50 mm × 165 mm (7 in. × 2 in. × 6-1/2 in.)
Nose .................. 170 mm × 46 mm × 27 mm (6-3/4 in. × 1-3/4 in. × 1 in.)
Weight ............................. 2.0 kg (4.4 lbs)

Display
Screen size/aspect ratio ... 7.00 inch wide/16:9 (effective display area:154.1 mm × 85.9 mm)
Pixels ............................... 1,152,000 (2,400 × 480)
Display method................ TFT active matrix, driving type
Color system .................... NTSC/PAL/PAL-M/PAL-N/SECAM compatible
Durable temperature range (power off) ...................................
–4 °F to +176 °F

Audio
Maximum power output ... 50 W × 4
Continuous power output .............................................. 22 W × 4 (50 Hz to 15,000 Hz, 5 % THD, 4Ω load, both channels driven)
Load impedance ............ 4Ω (4Ω to 8Ω (2Ω for 1 ch) allowable)
Power maximum output level ........................................ 4.0 V
Equalizer (8-Band Graphic Equalizer):
Frequency ...................... 40 Hz/63 Hz/100 Hz/125 Hz
Slope .................... –6 dB/oct
Gain ............................... ±12 dB
HPF:
Frequency ...................... 50 Hz/63 Hz/100 Hz/125 Hz
Slope .................... –12 dB/oct
Subwoofer (mono):
Frequency ...................... 50 Hz/63 Hz/80 Hz/100 Hz/125 Hz
Slope .................... –18 dB/oct
Gain ............................... +4 dB to –24 dB
Phase .................... Normal/Reverse
Bass boost: Gain ............................... +12 dB to 0 dB

DVD Player
System ......................... DVD video, Video CD, CD, WMA, MP3, AAC, DivX, JPEG, MPEG player
Usable discs ............................ DVD video, Video CD, CD, CD-R/RW, DVD-R/RW/R DL
Region number ............. 1
Frequency response ........... 5 Hz to 44,000 Hz (with DVD, at sampling frequency 96 kHz)
Signal-to-noise ratio ........ 96 dB (1 kHz) (IHF-A network) (RCA level)
(AVH-X7500BT/AHV-X6500DVD)
Signal-to-noise ratio ........ 91 dB (1 kHz) (IHF-A network) (RCA level)
Output level: Video .................... 1.0 Vp-p/75 Ω (±0.2 V)
Number of channels .... 2 (stereo)
MP3 decoding format ...... MPEG-1 & 2 Audio Layer 3
WMA decoding format ..... Ver. 7, 7.1, 8, 9, 10, 11, 12 (2 ch)
WMA decoding format ..... Ver. 7, 7.1, 8, 9, 10, 11, 12 (2 ch)
AAC decoding format ...... MPEG-4 AAC (iTunes encoded only) (1mA)
(AVH-X7500BT)
AAC decoding format ...... MPEG-4 AAC (iTunes encoded only) (1mA)
(Vor. 10.6 and earlier)
DivX decoding format ...... Home Theater Ver. 3, 4, 5.2, 6
(MPEG video decoding format)
MPEG video decoding format .......... MPEG1, MPEG2, MPEG4

USB
USB standard specification ............................ USB 1.1, USB 2.0 full speed
USB Class ....................... MSC (Mass Storage Class)
File system ............................ FAT16, FAT32
MP3 decoding format ...... MPEG-1 & 2 Audio Layer 3

WMA decoding format ...... Ver. 7, 7.1, 8, 9, 10, 11, 12 (2 ch)
AAC decoding format ...... MPEG-4 AAC (iTunes encoded only) (Ver. 10.6 and earlier)
WAV:
WAV signal format .......... Linear PCM, MS ADPCM (Linear)
Sampling Frequency ..................................... Linear PCM:16 kHz, 22.05 kHz, 24 kHz, 32 kHz, 44.1 kHz, 48 kHz
MS ADPCM:22.05 kHz, 44.1 kHz

FM tuner
Frequency range ............. 87.9 MHz to 107.9 MHz
Usable sensitivity ............ 9 dB (0.8 µV/75 Ω, mono, S/N: 30 dB)
Signal-to-noise ratio ........ 80 dB (analog broadcasting)
Signal-to-noise ratio ........ 72 dB (digital broadcasting)

AM tuner
Frequency range ............. 530 kHz to 1710 kHz (10 kHz)
Usable sensitivity ............ 25 µV (S/N: 20 dB)
Signal-to-noise ratio ........ 80 dB (analog broadcasting)
Signal-to-noise ratio ........ 62 dB (digital broadcasting)

Bluetooth
Version ................. Bluetooth 3.0 certified
Output power ...................... +4 dBm Maximum

Note
Specifications and the design are subject to modifications without notice.

CEA2006 Specifications
Power output .............. 14 W RMS × 4 Channels (4 Ω and ≤ 1 % THD+N)
S/N ratio ....................... 91 dB (reference: 1 W into 4Ω)

Appendix
61
